Introduction to Guide

Information for Using This Guide

This guide is to help you install, authorize (“license”), and update your new copy of SPSS Statistics 17 for Mac OS.

During installation and licensing, screens will be displayed in which you must make choices or provide information. Among the information you must provide are your SPSS **serial number** and your SPSS **authorization code**. After installation, you are **strongly advised** to **apply Patch 17.0.1** .

To begin, you will need the following:

- Administrative rights on the computer you are working on
- Network access to access the SPSS installer over the network
- OR -
SPSS Statistics 17 CD
- Your authorization (or license) code
- Access to the internet.

Please feel free to print out this guide for reference.

If at any time a problem occurs, such as an error message or the program freezes, it is safe to cancel/abort the uninstall or installation process. Please contact CAS Computing should you require assistance or have any questions:

- Java Standard Edition 5.0 (J2SE 5.0)

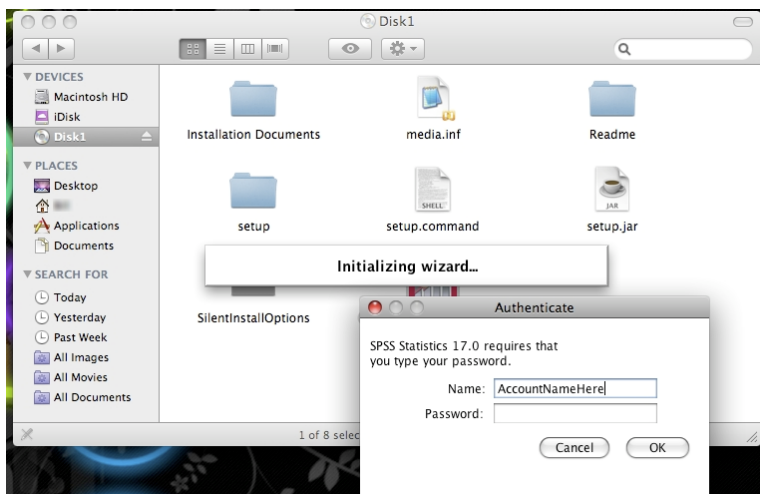

Installing SPSS

Installing SPSS in Mac OS X

To install SPSS Statistics 17 on your Mac, insert the first CD. The icon for **Disk1** will appear on the desktop, click to open it.

Alternatively, if installing off the network, to install SPSS from off the network, you will need to navigate to CAS Computing software network share. (Instructions for mapping your network shares on OS X 10.3 or higher, please refer to guide Mapping Your Shares on the CAS Computing website. For server information please contact CAS Computing.)

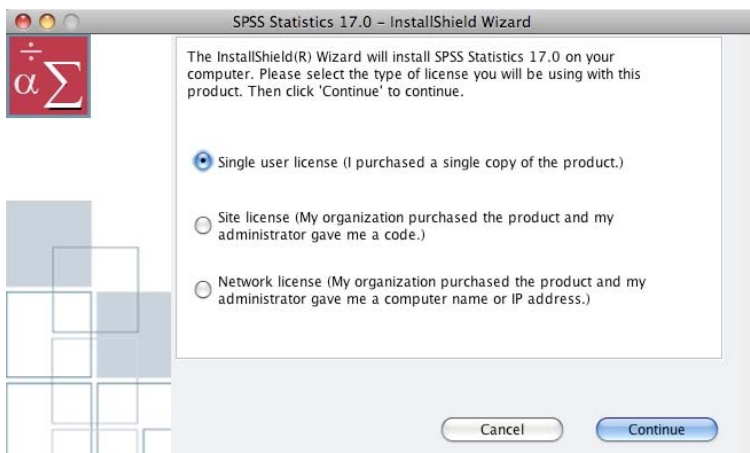

In the Disk1 folder you will see several folders and icons. Double-click on the **'SPSS Statistics Installer'** icon to launch the installer window.

Important!

Please only double-click the setup icon once. It may take up to a minute for the installer window to appear.

An administrator account will be asked to **Authenticate with a Name and Password**. After entering this information, click **OK**.

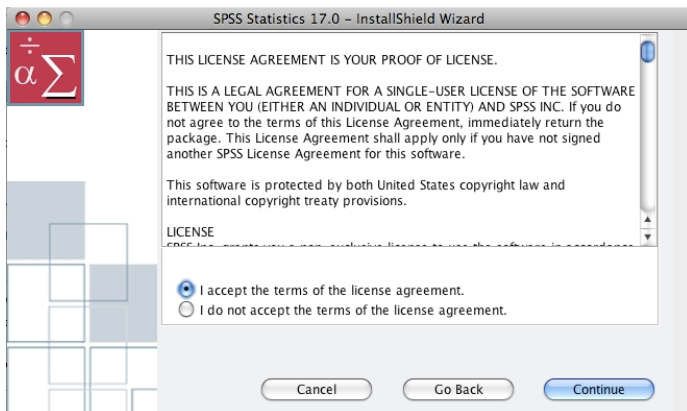

When prompted for license type, be sure that the radio button for **Single user license (I purchased a single copy of the product)** is selected.

Click **Continue**.

Installing SPSS

Installing SPSS in Mac OS X

The next window to appear will be the License Agreement.

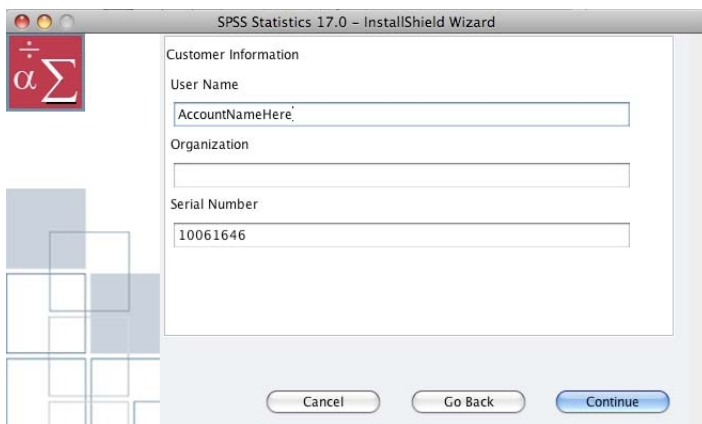

Feel free to review this document.

Choose the option :

I accept the terms in the license agreement.

By default, this option is not checked.

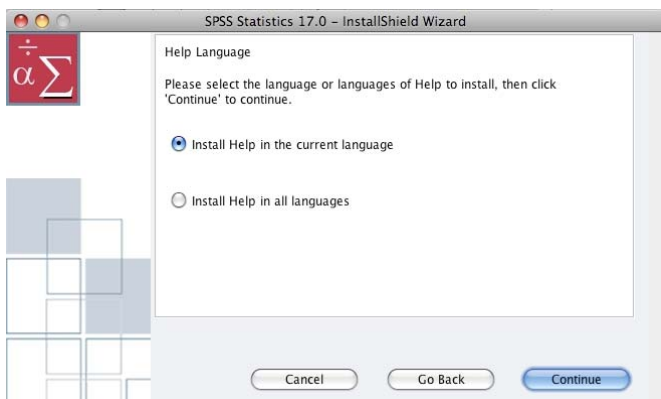

Click **Continue**.

The next screen will ask for some Customer Information.

Enter your **User Name** (your name), **Organization** (if applicable), and the **serial number: 10061646**.

Click **Continue**.

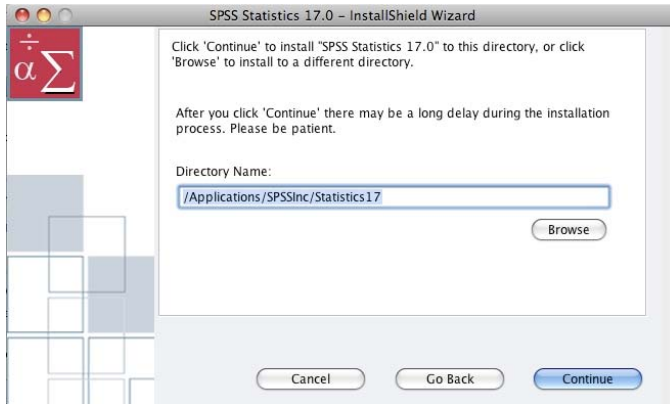

The Help Language screen should have the option **Install Help in the current language** selected.

Click **Continue**.

Installing SPSS

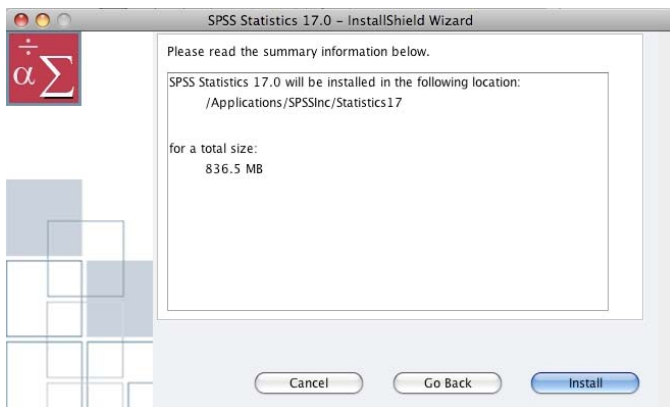

Installing SPSS in Mac OS X

The Destination window will ask you where to install SPSS.

Unless there is a specific reason to change it, keep the default installation path.

Click **Continue**.

Next, the Read to Install the Program window will appear.

Having selected and/or inputting all the information the installation of SPSS Statistics 17.0 can now begin.

Click on **Install**.

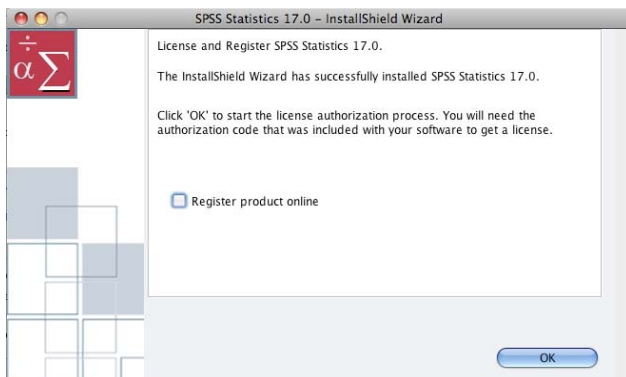

The window will change to one with a progress bar. Several windows may open/close. Please give the installer between 5-10 minutes to complete.

Once the installation process has finished, the License and Register SPSS Statistics 17.0 window will appear.

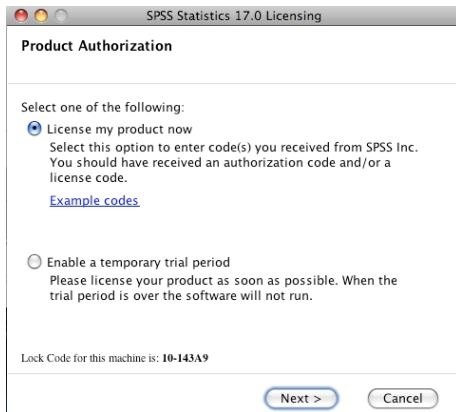

We do not need to register this software, so please uncheck the Register with spss.com box on the lower-left area of the box. By default this box is checked.

Click **OK** to continue to the **License Wizard**.

Licensing SPSS

Applying Your License for SPSS in Mac OS X

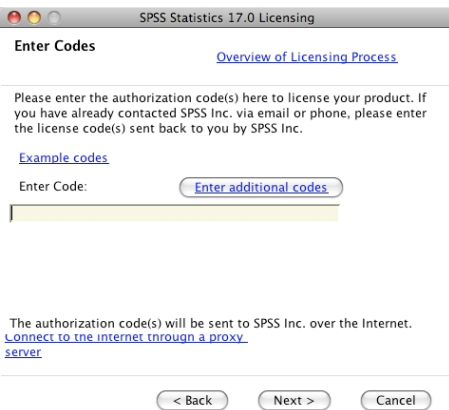

The Product Authorization Wizard will appear at the end of the SPSS Statistics Installation.

To license your copy of SPSS, select the first option **License my product now**.

Click **Next**.

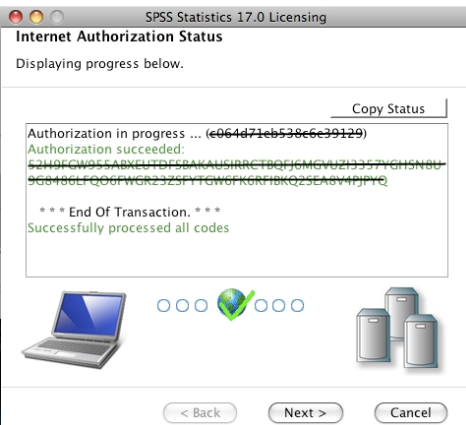

(Please note that your **Lock Code** is located on this screen. If you encounter difficulties entering your authorization code, your technology coordinator may ask for this number.)

In the **Enter Code:** field, please enter the license or authorization code given to you.

The license or authorization code entry is not case sensitive.

Once you have entered in the code, click **Next**.

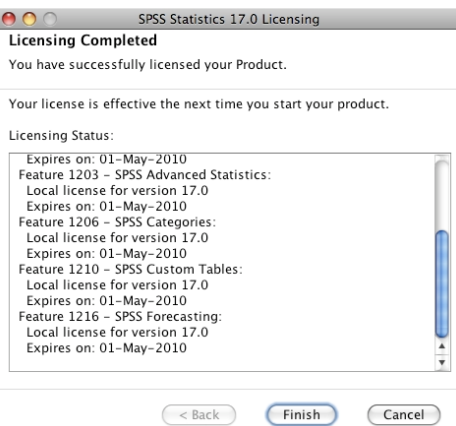

The progress screen may appear blank for several seconds.

If the authorization is successful you will receive green text telling you that that the process has **Successfully processed all codes**.

Hit **Next** to continue.

If you receive red failure text, hit Back, and check the code to make sure it was input correctly.

If the red text persists, contact your Technology Coordinator with your Lock Code (see above).

If your authorization was successful, the Licensing Completed window will appear showing you the list of packages/modules licensed along with the expiration date of the license.

Click **Finish** to close the License Authorization Wizard.
