Hispanic Literature in Translation: Apparitions and the Haunted in Latin American Literature (3)
This course offered online through the Blackboard Learning System. The otherworldly, and the supernatural have inspired the works of many authors internationally. In this course we read important twentieth century Latin America novels and short stories that deal with supernatural themes. We will explore how these works subvert dominant notions of realism. At the same time, we analyze how critical terms such as Fantastic, the Marvelous Real, and Magical Realism are used to describe Latin American narratives and discuss the ways in which these terms have been problematized over time. This course is taught in English.
