The University at Albany puts the world at your doorstep. Within your reach are opportunities to study and learn with people from around the globe. Intellectually and socially, you’re immersed in a new world, one bursting with possibilities for discovery. You gain fresh insights from new challenges, new people, new adventures. Experiences that lay the foundation for you to succeed in life.
From business to biology, and everything in between. With nine schools and colleges—more than 50 majors and over 60 minors—you can choose courses that align with your interests and follow your life’s passion. Each year brings new majors, including recent additions such as bio-instrumentation, digital forensics, informatics, and urban studies and planning. Can’t find exactly what you’re looking for? Combine courses to create your own interdisciplinary major.

Strong programs that attract strong students. We’re renowned for our rigorous undergraduate and top-rated graduate programs. Students are drawn to our largest school, the College of Arts and Sciences, for the scope and intensity of its programs. History, English, and communication and rhetoric. Environmental sciences, biochemistry and molecular biology. And one of our most popular majors, psychology. Students who graduate from our School of Business are highly sought after by leading financial firms. Across the University, undergraduates are routinely accepted into prestigious graduate, law, and medical programs. U.S. News & World Report ranked many of our graduate programs among the top 50 in the United States. This includes programs in clinical psychology, criminal justice, library and information studies, public affairs, public health, sociology and social work. And MBA graduates from our School of Business have had a 100 percent job-placement rate three years in a row. What does this mean for you? Professors from these top-ranked programs will be teaching you—placing the world within reach, right in your classroom.

An honors community. Our Honors College combines the best of a small college liberal arts experience with the strengths of a nationally ranked public research university. You’ll live and learn in a community that’s ambitious and involved. And it all culminates in a scholarly thesis built around your original research or creative work. As a researcher, you can present your findings at conferences or publish your results in academic journals. That’s a great addition to your resume, giving you the edge in the competition for the best jobs and graduate schools.

LEARN TO SEE FROM A NEW PERSPECTIVE.

Welcome to a university that attracts some of the best faculty and students from more than 100 countries. Top-notch researchers in existing and emerging fields. And visiting lecturers willing to voice their diverse opinions. It’s a life-altering experience—one that prepares you to find your place and make a difference in the global community.

This education can change your outlook. You’ll live, learn, and connect with people whose diversity enriches every aspect of campus life. Campus-wide events offer lots of opportunities to celebrate different cultures and faiths. But it’s the day-to-day interaction that gives you a new view of the world. Sharing a class, a meal, or a room with someone from across the state or around the globe. Finding out that, despite your differences, you share common goals and dreams. Every day offers new opportunities to discover yourself and those around you.

Study abroad? Name the place. Spin a globe, point your finger randomly at just about any land mass, and odds are you can study there. UAlbany offers over 130 programs in more than 40 countries and on every continent. You can also participate in one of the more than 600 programs offered through the SUNY Study Abroad Consortium. No matter where your travels take you, you can earn college credit while having the experience of a lifetime.

STUDY ABROAD.

“My experience in Milan was almost indescribable. I was immersed in the language on a day-to-day basis, so, after leaving home with only minimal Italian comprehension, by the time I came back, I was practically fluent. The best feeling was when my family came to visit over spring break and I was able to show them around Milan without a map. I have the best memories of my time in Italy and I will recommend studying abroad to any student who asks.”

Whitney Sperrazza
English Major, Theatre Minor
Learn here. UAlbany facilities reflect our modern vision. Our Life Sciences Research Building and Cancer Research Building highlight our strength in the sciences. Our University Art Museum, Performing Arts Center, and Boor Sculpture Studio nurture and showcase the visual and performing arts. The University Libraries are home to more than two million volumes, ranking among the nation’s top research libraries. And the new $64 million home of our School of Business offers a world-class environment for students and faculty.

Live here. Start as a freshman in our quad residence halls, within easy walking distance of all the action: classes, dining halls, the Campus Center, and our famous fountain. As an upperclassman you can choose to stay on campus in one of our residence halls or try apartment living. But no matter where you live, you’ll feel right at home with Student Association clubs that keep you in the loop. Some of the best entertainment in town is right here on campus. Come to our UAlbany programs and see for yourself.

Play here. Our athletic facilities are the perfect place to blow off steam, join a pick-up game, or challenge a friend to a tennis match. Consider joining the Marching Great Danes who perform at home football games. Serious athlete? Our Division I facilities include an 8,500-seat football and soccer stadium, an Olympic-caliber track and field facility, and one of the nation’s few lacrosse-only fields. Not to mention the SEFCU Arena, home to our America East men’s and women’s championship basketball teams.
That’s entertainment. See your favorite bands at the Times Union Center, a popular stop on national concert tours. Performers also take to the stage at the Palace Theatre, The Egg, Proctor’s Theatre, Troy Savings Bank Music Hall, and local clubs. Of course, there are plenty of shows on campus, too. Prefer the great outdoors? Hit the slopes or go for a hike in the nearby Adirondacks, Catskills, or Berkshires. Race along paved paths or take to the trails on mountain bikes. Explore great parks or soak up the scenery in beautiful natural landscapes.

In the heart of the state capital, UAlbany is in the capital of New York, a state whose influence is felt across the nation and around the globe. Here government and industry intersect with health care and high tech. As a result, we offer programs in areas such as public policy, criminal justice, business, information management, and public health. Our students intern in the state legislature, the New York Stock Exchange, entrepreneurial ventures, Fortune 500 companies, and public service agencies.

New York’s Tech Valley. We earned that nickname because the Capital Region is a hotbed of innovation. On campus and in corporate labs, researchers are conducting breakthrough work, tackling technologies most of us can only imagine. There’s an extraordinary combination of brainpower, energy, and excitement. Entrepreneurs feel it too, and are quick to locate start-ups here.

A real college town. With 20 colleges and more than 65,000 college students in the Albany area, something’s always happening. Head downtown to Lark Street for one-of-a-kind shops, cafes, and clubs. Meet up with friends at hot spots on Pearl Street or hang out in Washington Park. Check out on-campus events—at UAlbany and surrounding schools. Sports fan? Come root for the Great Danes as we take on local college rivals. Want to get away? You’re just a short drive or train ride from Boston, New York City, and Montreal.
