As one of the Northeast's most important cities, Albany is filled with opportunities that put the world within your reach. You'll have phenomenal experiences in one of the most influential centers of government. Extraordinary options in incubators for technology and research. Exciting possibilities in established companies and entrepreneurial firms. And, of course, plenty to do in a town that caters to college students.

**Government and industry.** Here, in the capital of New York, the world of government and policy is at your fingertips. This is a hub for state agencies responsible for everything from transportation to health care to the environment. But we also have businesses that spring up side-by-side with government entities. Financial organizations. Law practices. Lobbying firms. Media outlets. All looking to partner with one of the world's best public research universities — and provide invaluable opportunities for our students.

**A high tech hot spot.** Look around and it's obvious why the region is called Tech Valley. It is a place where researchers master breakthrough technologies and international companies set up shop to get in on the action. A hotbed of activity and a window to the future.

**So much to do.** Ready for some fun? You've come to the right place. The Capital Region has 20 colleges and universities and more than 65,000 college students. So there's always something happening. Big arena concerts, clubs, and coffee houses. College sports rivalries. Major shopping malls and one-of-a-kind boutiques. And plenty of places to just relax and enjoy.
Tapping the region’s resources. The strengths of the Capital Region are reflected across our curriculum. No other university has a School of Public Health that’s a joint venture with the state Department of Health. A forensic chemistry sequence, offered in conjunction with the New York State Police Forensic Investigation Center. And a top-ranked School of Social Welfare with connections to public and private agencies throughout the region. Thinking about pre-med? Get a taste of life on the front lines at one of the many local hospitals. Or, assist researchers in the state-of-the-art science centers on our East Campus. Interested in government? Earn credit and firsthand experience through internships with the New York State Legislature. Studying weather or climate change? Our Department of Atmospheric and Environmental Sciences boasts the largest concentration of atmospheric scientists in the country. No matter what your major, your experiences will be enriched by resources unique to our region. All this shapes your perspective and your future. Connections that can last a lifetime. The Capital Region is just the beginning. UAlbany also links you to an alumni network that’s 162,000 strong. Fellow Great Danes who’ve made their mark in virtually every field. Medicine and law. Accounting and finance. Education. Information technology. They’re proud of their relationship with UAlbany and sincerely want to help pave the way for those who come after them. Making them an invaluable resource for graduates entering the workforce.

A gathering place for literary legends. UAlbany is host to the New York State Writers Institute, founded by our own William Kennedy, English professor and Pulitzer Prize-winning novelist. Each year, the Institute welcomes 40 to 50 literary stars to campus: Nobel Prize, Pulitzer Prize, National Book Award, and Motion Picture Academy Award winners. Reading from their own works and holding seminars and workshops. Past guests have included T.C. Boyle, Lydia Davis, Junot Díaz, Richard Dreyfuss, Mary Higgins Clark, Gilbert King, Spike Lee, Ayana Mathis, and Dinaw Mengestu.

A dream realized. “Albany’s location is one of many reasons that I decided to attend UAlbany. The city offers some really unique opportunities that you can take advantage of, for me it was becoming Albany’s Tulip Queen. As Tulip Queen, I became an ambassador to the City of Albany for one year and it was the best experience of my life.”

Sarah Volk Sociology Major
Our region is a remarkable junction of government, technology, business, and culture. It is the ideal place for limitless opportunities, giving you the real-world experience you need to succeed. Rub shoulders with legislators creating new policies. Conduct research in cutting-edge technologies. Practice the science and compassion of health care in some of the region’s most advanced hospitals and medical centers. Or, just a short train ride away, experience the frenzy of Wall Street.

Never a dull moment. You’ll find plenty to do, on and off campus. Start with UAlbanyGo, your source for information on events and activities. Everything from concerts and speaker series to cultural events and football games. Looking to go farther afield? Head downtown to Lark Street for quaint shops and cafés. Hang out with friends on Pearl Street. On a sunny day, make tracks for Washington Park, Albany’s equivalent of New York’s Central Park. A magnet for skateboarders, roller bladers, dog walkers, and Frisbee enthusiasts.

Catch a show. See your favorite bands at The Times Union Center, a popular stop on national concert tours. Performers also take to the stage at the Palace Theatre, The Egg, Proctor’s Theatre, Troy Savings Bank Music Hall, Capital Repertory Theatre, and other local venues. Of course, there are plenty of shows on campus, too. And, if you’re around for the summer, be sure to check out Saratoga Performing Arts Center, better known as SPAC.

From the great outdoors to major metropolitan areas. Fun is always in season here. Hit the slopes or take a hike in the nearby Adirondacks, Catskills, or Berkshires. Go for a ride on local bike trails or set sail on the Mohawk or Hudson rivers. Explore great parks and relax in beautiful natural landscapes. Miss the hustle and bustle of big city life? You’re just a short drive or train ride from Boston, New York City, and Montreal.
A MODERN CAMPUS DESIGNED TO PROMOTE LEARNING—AND LIVING.

You’ll eat, live, learn, and have fun with students from more than 90 countries, all drawn by a location and university that place the world within reach.

Fields fit for champions. Our new Athletic and Recreation complex includes a multi-use synthetic turf field, an Olympic-caliber track and field venue, and Bob Ford Field, an 8,500-seat football and soccer stadium.

Outstanding faculty. We attract some of the world’s finest faculty, including prize-winning authors, Fulbright and visiting scholars, and members of the National Academy of Sciences.

March Madness. In 2006, UAlbany made history as the first New York public institution to advance to the NCAA Division I men’s basketball tournament. In 2013 and 2014, both the men’s and women’s basketball teams advanced to the NCAA tournament.

Top-ranked libraries. Together, the three University Libraries have more than two million volumes and are ranked among the nation’s top research libraries.

Division I contenders. Eight of our 19 Division I teams won America East championships in 2013-14 and UAlbany claimed the conference’s Stuart P. Haskell, Jr. Commissioner’s Cup, recognizing the strongest athletic program, for the third time since joining the conference in 2001.

Club sports. We offer 20 club sports, including equestrian, hockey and rugby teams. Exceptional facilities, indoors and out, make it easy to stay in shape and play your favorite sport.

School pride. There’s so much to cheer about, from top-ranked programs and groundbreaking research to exciting athletic rivalries. Bottom line: it’s great to be a Great Dane!
