_____		_____		_____	
(overall GPA)		(BCPM)		(ALL other)	

INSTRUCTIONS:

Use **ALL** college credits ever taken anywhere for which you were given a grade. Multiply the **number** of **credits** by the points for that grade. Add the column of credits, then add the quality points. Divide the quality points by the total of credits for each cumulative average. For a Committee Interview, this form should **include** your most recent grades from the fall semester, **as well** as ALL previous college credits.
