TRANSFER SEMINARS AVAILABLE FOR FALL 2015:
These are available to all new transfer students who are not participating in a Living-Learning Community. We recommend all students eligible register for one. Speak with your advisor for more information!

Transfer Seminars                  1-credit classes (UUNI 350 – 1 credit, graded A-E)
These classes are designed specifically for new transfer students to get to know each other and a member of our faculty in a small class setting. They are great opportunities to learn about a cutting edge topic from our best faculty while developing the skills needed to be a successful UAlbany student. Classes meet once a week for 55 minutes and provide students with an intimate learning experience designed to help them acclimate to the academic challenges at the University at Albany.

Professor Kevin Bronner
#8151  M 1:40 - 2:35
Personal Financial Planning for College Students
BB 129
This course will instruct students how to conduct financial planning related to events such as 1) student loan payments, 2) credit card debt, 3) housing costs, 4) automobile payments. Basic accounting principles will be reviewed in class to enable the students to understand personal finance issues. Students will be able to construct a real or hypothetical personal financial plan.

Professor Caroline Buinicky
# 10305  T 10:40 – 11:35
Diversity in Computing
HU 114
Ever wonder about technology and computing pioneers? Did any of them come from under represented populations? The answer is YES! In this class, we will study female and minority leaders who have had a major influence, or are currently having an effect on, the computing field. While women are underrepresented in the computing field, Ada Lovelace is widely acknowledged as the first computer programmer. Explore these and other important contributions made by women and minorities.
