A Multi-Disciplinary Approach to Challenging Behaviors

Distinguished Guest Speaker: Matthew Siegel, M.D.
Director, Developmental Disorders Program at Spring Harbor Hospital and Maine Medical Center
Assistant Professor, Department of Psychiatry and Pediatrics at Tufts University School of Medicine
Clinical Investigator, Maine Medical Center Research Institute

Friday, March 10, 2017
9:00—11:00 am
The Desmond Hotel
660 Albany Shaker Road
Albany, NY 12211

Dr. Siegel is the Director of the Developmental Disorders Program of Spring Harbor Hospital and is actively researching and publishing in the area of autism and serious behavioral disturbance. He attended Amherst College and Stanford Medical School and completed Triple Board Training at Brown University in child psychiatry, psychiatry and pediatrics.

He is a Clinical Investigator at the Maine Medical Center Research Institute, an assistant professor in the Department of Psychiatry of Tufts University School of Medicine, and the founder of a national inpatient research collaborative on children with autism and developmental disorders.

Dr. Siegel serves on the Autism and Intellectual Disability Committee of the American Academy of Child and Adolescent Psychiatry. He is the PI for a multi-site phenotype-genotype study of children severely affected by autism that will examine relationships between phenotypic domains of communication, intelligence, psychiatric co-morbidity and corresponding genetic pathways.
