Seminar for parents and non-medical professionals

Featured Presentation

Neurobiological and Neuroimmune Strategies for Understanding Autism Spectrum Disorder (ASD)

Distinguished Guest Speaker:
Dr. David Amaral
Distinguished Professor
Department of Psychiatry and Behavioral Sciences
Director of Research, UC Davis Mind Institute

Thursday February 27, 2014
2:00–4:00 pm
The Desmond Inn
660 Albany Shaker Road
Albany, NY 12211

Nationally recognized expert Dr. David Amaral will present research on the neuroanatomy of autism which explores neurobiological and neuroimmune strategies for better understanding autism spectrum disorders. Findings from neuroimaging studies regarding brain structure in children with autism will also be discussed.
