The Life Sciences Research Symposium will take place on November 3rd, 2017 at the State University of New York at Albany in the D’Ambra Auditorium of Life Sciences Research Building.

This event provides an opportunity for UAlbany graduate students and postdoctoral fellows to present their Life Science research in talks and posters, mimicking the format used at scientific conferences.

It is an important event to promote collaboration among researchers in Biology, Chemistry, Physics, and Psychology and train students to present their work.
