

University at Albany

DEPARTMENT of CHEMISTRY

FALL 2009 SEMINAR SERIES

- September 8 **Kevin Kittredge, Ph.D.**, Siena College
Growth, Stability, and Optical Properties of Film Assemblies Of Nanoparticles and Nanoshells
- September 22 **Reinhard Schweitzer-Stenner, Ph.D.**, Drexel University
Using Vibrational, Optical and NMR Spectroscopy to Explore Unfolded and Self-Aggregating Peptides
- September 29 **Lothar Krinke, Ph.D.**, Medtronic Neuromodulation
Accelerating Collaborative Innovation Leading to Medical and Industrial Products: University Based Discovery, Small Start Ups and Billion Dollar Companies
- October 6 **Peter Kutchukian**, Harvard University
In silico Growth of Molecules Occupying Drug-Like Chemical Space
- October 13 **Svilen Bobev, Ph.D.**, University of Delaware
Novel Antimonides and Bismuthides with the D-Metals
- October 20 **Klaus Pörschke, Ph.D.**, Max Planck Institut Mulheim
Plastic Crystals In Organometallic Chemistry: The Muetterties Complexes
- October 27 **Tristan Lambert, Ph.D.**, Columbia University
Reaction Design with Aromatic Ions
- November 3 **Yan Yeung Luk, Ph.D.**, Syracuse University
Water-Driven Bioorganic Reactions and Nonamphiphilic Colloidal Science: From Adhesion Biology to Enhanced Biocatalysis
- November 10 **Jogendra Behera, Ph.D.**, University at Albany
Talk Title: to be announced
- Yan Han**, University at Albany
A Functional Study of GluR2R Receptor Channels
- November 17 **George Makhatadze, Ph.D.**, Rensselaer Polytechnic Institute
Designing Proteins That Can Withstand Extreme Conditions
- November 24 No seminar
- December 1 **Halimah Sayahi**, University at Albany
Studies of FAS I Isolation and Inhibition
- Jogendra Behera**, University at Albany
Synthesis and Characterization of Metal-Organic Frameworks (MOFs) for Catalytic Applications

Life Sciences D'Ambra Auditorium

Seminar Time 4:30pm

Light refreshments at 4:15pm

FREE AND OPEN TO THE PUBLIC
