# CPS/DV Co-location Program Logic Model

## ACTIVITIES
- Cross systems training
- Regular workgroup meetings
- Joint home visits
- Joint safety planning and case follow up
- Formalized referral process
- Formalized screens and assessments
- Written protocols
- Co location/Proximity

## SHORT TERM OUTCOMES
- Improved understanding of domestic violence by child welfare staff
- Improved understanding of the child welfare system by DV staff
- Increased confidence and skill level of CPS workers to strategize effective and safe approaches for home visits with families experiencing DV
- Increased confidence and skill level of DV staff to effectively work with victims and their families who have CPS cases
- Improved system coordination and communication
- Better role clarification
- Reduced CPS workload

## INTERMEDIATE OUTCOMES
- Improved and earlier identification of DV by CPS
- More accurate DV assessments
- More comprehensive and appropriate services for victims and offenders
- More timely access to services
- Enhanced family engagement in service systems
- Improved victim knowledge and involvement in safety strategies and available services
- Enhanced family systems approach

## LONG TERM OUTCOMES
- Reduction in rate of repeat maltreatment
- Reduction in rate of out of home placements
- Decreased exposure to violence for children
- Improved family functioning and family stability
- Expedited reunification of family
- Increased empowerment of victims to protect themselves and their children
