TOTAL RETURNS, YEAR TO DATE: U.S. ACTIVELY MANAGED EQUITY MUTUAL FUNDS VERSUS VANGUARD INDEX FUNDS

31 AUGUST 2009

The tables below show the total returns of U.S. domestic actively managed mutual funds in nine Morningstar categories versus the corresponding Vanguard index fund. Through August 2009, value fund managers of all market caps have generated higher returns than index funds, with large-cap value managers leading the way. Active core and growth managers are finding it hard to keep pace with the index funds. Comparisons are especially problematic for small-cap core and growth funds.

Vanguard Index Fund*		Actively Managed Funds, Aug	Percent of Actively Managed Funds Outperforming Corresponding Vanguard Index Fund:*** YTD 2009 Ending with Month ...										
Fund Name (Ticker)	Index Tracked**		Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov

Total		15.33%	0.55%	1.44%	0.89%	0.31%	0.40%	0.44%	0.25%	-0.53%			

NOTES:

* "Vanguard Index Fund" is the passively managed, investor-class mutual fund corresponding to each Morningstar category.

** "Index Tracked" is the MSCI U.S. index in each case, except for the large-cap core category which has a benchmark index of the S&P 500.

*** Actively managed funds with returns greater than or equal to returns for the corresponding Vanguard index fund are in the "outperforming" group. Fund returns are net of expenses but not loads. Funds must be 80-100% invested in U.S. common stock. We retain only one class of each fund.
