

For each Class, NEPHLI brings Scholars together at three Retreats for more than 50 hours of experiential leadership development that consist of a series of core courses and other contemporary issues that vary depending on the needs of the Scholars. Other programming is offered through distance learning through conference calls/PowerPoint presentations, the Advanced Leadership Program (for alumni) and at state public health association meetings and at American Public Health Association (APHA). In addition, the program promotes team building and networking through a Scholar Project developed during the course of the year. Below is a sample of the curriculum.

### **Leadership Development**

Leadership Practices Inventory  
How Do Promising Leaders Derail Themselves  
Diversity Leadership
