**Talking Word Processors**

Talking Word Processors are writing software programs that provide speech feedback as the student writes, echoing each letter as it is typed and each word as the spacebar is pressed. These programs often include other assistive features such as word prediction and spell check.

- **Microsoft Magnifier**
- **Mac Magnifier**

**Talking Calculators and Dictionaries**

A talking calculator has a built-in speech synthesizer that reads aloud each number, symbol, or operation key a user presses; it also vocalizes the answer to the problem. A talking dictionary will read the word and definition aloud. Both are available in hand-held models or as software programs.
