

Library Resources

Assignment (all language groups):

Supply the following information, using Minerva where appropriate:

1. How many copies of *Sources of Chinese Tradition* does the library own? What are their call numbers? Where are they located (what floor/section)?
2. Let's say you're doing a paper on Chinese geography. Using Minerva, find 5 resources in our library. Limit your results to English language resources. Include these results with this homework assignment.
3. Where (physically) can you find books on "traditional" (not electronic) reserve?
4. If you find a book on Minerva labeled as in "Storage," how can you get access to it? Be specific as possible, i.e., don't simply say, "Ask a librarian."
5. Your paper is due in ten minutes, but you still need to print it out. There's no time to rush from one computer lab to the next, looking for a free machine. How can you find live information on available machines?

For each question, you must include an explanation of how you found the information, i.e., "keyword search of titles containing <blurp>" resulted in..." or "exact subject search of subjects containing <blurp> resulted in..."
