Tu/Th 9:45-11:05 am, ES 242
Instructor: Dr. Caro-Beth Stewart

Abstracts for Term Paper
Cover Sheet

Please hand in **only one** (1) copy of this cover sheet per group **on March 20, 2001**. It should be filled out and **stapled** to the front of about 10 abstracts (the front page of the **original** article; do not hand in MedLine or other 'online' abstracts). Your abstracts should be chosen carefully. They should **all** pertain to the topic you are going to review, and **most** of them should be from the **primary** scientific literature (that is, they should be from scientific journal articles that report original findings, rather than be review articles or popular accounts from the lay press). A good site to look on the WWW is PubMed at the following URL: <http://www.ncbi.nlm.nih.gov/Entrez/index.html>. By signing the form below, you are agreeing to collaborate with the other members of your group to complete the term paper and class

Topic Originally Chosen: _____

Revised Topic (if applicable): _____

Focus of Paper (if known): _____
