“The Constitutional Committee will send electronic copies of agendas, meeting minutes, and proposed amendments to the GSO Vice President in a PDF format with the request that they be uploaded to the website as soon as possible after each meeting.”

“The Constitutional Committee assesses that a Constitution should consist of the core mission of an organization, its general governing principles, a statement of compliance with relevant law, officer positions and their responsibilities, election and appointment rules, and amendment processes. The Bylaws should exist to elucidate specific duties of officers and the details of operation including, but not limited to, financial rules, rules regarding subsidiary organizations, and election procedures.”

“The Constitutional Committee assesses that in addition to the President and Treasurer’s signature being required for expenditure of funds, an authorized Committee’s Chair should also be required.”

“The Constitutional Committee believes the appointment of a Judicial Board is of the utmost importance and should be conducted immediately, pursuant to the recommendations and rules of the Constitution.”

“The Constitutional Committee recommends that all motions be submitted in writing a week in advance unless they are of a time sensitive nature.”

“The Constitutional Committee has determined after much discussion that, in order for the Constitution to fulfill its role as our governing document, substantial restructuring will be necessary. This will require the Bylaws to be restructured as well, so as to establish the procedures necessary to operate constitutionally. This obviates the need for separate financial guidelines and core committee rules, as they will be incorporated appropriately into either the Constitution or the Bylaws.”
