

ABSTRACT

Status of Children's Environmental Health in Bangladesh

Md. Abdul Hakim Mondal
Country Coordinator
Bangladesh Eco-Village Network

Children in Bangladesh became victims from environmental hazards in various ways. Majority children of this country do not have the opportunity to work in a clean and conducive atmosphere even for a day. They suffer from various diseases for the whole life and fall into death in a very early age. Particularly the influence of the environment in the children is manifold and severe. Children are affected by environmental pollution of any means. The serious victims of environment pollution are the children those who are especially in difficult circumstance i.e. Children of Tea garden labors, Brothels, Slums and street. They are suffering from Tuberculosis, respiratory problems and other dangerous and transmitted disease. Child labor in Bangladesh is a natural phenomenon. Child those who are working in hazardous job like Jut factories, Photo labs, Galvanizing Plant, Printing press, Paint factory, Match factories, Washing plants, Cigarette Factories and other hazardous chemical plants are in a very critical situation. The situation is worst then other places in the world in-terms of statistics of children mortality caused by the environment pollution. However, the present paper has made an attempt to discuss the status of the children's environmental health in Bangladesh.
