Entrepreneurship Lecture Series

Michael Brennan, Ph.D.
Senior Advisor for Global Affairs,
Aeras Global TB Vaccine Foundation
Rockville, MD

"Strategies for Developing and Introducing Novel Vaccines to Combat Tuberculosis"

Thursday March 11th at 4PM; Reception at 3:30PM
Constance & Thomas D’Ambra Auditorium,
Life Sciences Building (LSRB), University at Albany

Dr. Brennan is Senior Advisor for Global Affairs at the Aeras Global TB Vaccine Foundation as well as a representative to the Bill and Melinda Gates Foundation. Previously he worked for 20 years at the FDA where he gained experience in and designed drug approval protocols. Dr. Brennan is a leading authority on TB and on the development of drugs to treat and vaccines to prevent TB.

Dr. Brennan completed his postdoctoral training at the Burnham Institute (formerly the La Jolla Cancer Research Foundations) and the NIH. He holds a Ph.D. in Experimental Pathology from Albany Medical College and obtained his undergraduate education at the University at Albany. He was elected as a Fellow to the American Academy of Microbiology, received two FDA awards of merit for licensure, one for the first vaccine to prevent Lyme disease and one for Quantiferon (TB Assay), and holds two US patents.

Part of the series of seminars on corporate/academic interactions, entrepreneurship and the development of University spin-off companies in biotechnology, biomedical science and applications

Sponsored by the Institute for RNA Science and Technology, IRNAST

If you wish to meet with Dr. Brennan please contact Albert Millis [millis@albany.edu]
