Centennial Avenue School, Roosevelt

In Roosevelt, consistency in curriculum and instruction across schools in the district is supported by a variety of tools, including a monthly Curriculum News calendar that helps specialists know what is being covered in ELA, math, and science.

March Science Lab Explorations

Grade 3: Static Electricity

Students will discover how some materials develop static charges when they are rubbed together.

Students will conduct experiments to investigate how a statically charged object affects other objects. They will also test how balloons with like and unlike charges interact with each other and with other materials.

Grade 4: Water Cycle

Students investigate the water cycle and identify the major points of the water cycle as evaporation, condensation, and precipitation. Students will construct a visual aid which depicts the water cycle.

Note to Grades 1 & 2 Teachers:

In preparation for ELA & Math regional testing next month, please review using bubble sheets with your students. Sample bubble sheets have been sent via email.

Roosevelt, Centennial Avenue School
Study Year: 2010-11
