Hands Up—Agree

Hands Down—Disagree
“Men do not have to be worried about sexual assault.”

“In most situations, when a person says ‘No’ to a sexual advance, they probably do not want you to continue pursuing them”
SEXUAL VIOLENCE

Sexual Assault
- 1 in 5 for females
- 1 in 33 for males

Stalking
- 1 in 5 for females
- 1 in 14 for males

Intimate Partner Violence
- 1 in 3
When sexual violence occurs within the UAlbany Community, the University will promptly take action to:

- STOP
- PREVENT
- REMEDY

Applies to students AND guests
On AND off campus
Affirmative consent is a knowing, voluntary, and mutual decision among all participants to engage in sexual activity.

Consent can be given by words or actions, as long as those words or actions create clear permission regarding willingness to engage in sexual activity.

Silence or lack of resistance, in and of itself, does not demonstrate consent.

Consent to any sexual act or prior consensual sexual activity between or with any party does not constitute consent to any other sexual act.
Consent is required regardless of whether the person initiating the act is under the influence of drugs or alcohol.

Consent may be initially given, but withdrawn at any time.

Consent can not be given when it is the result of any coercion, intimidation, force or threat of harm.

When consent is withdrawn, or can no longer be given, sexual activity must stop.

This definition does not vary based upon a participants sex, sexual orientation, gender identity, or gender expression.
Consent **can not** be given when a person is incapacitated.

- Incapacitation occurs when an individual lacks the ability to knowingly choose to participate in sexual activity.
- Incapacitation may be caused by the lack of consciousness or being asleep, being involuntarily restrained, or when an individual can not otherwise consent.
- Depending on the degree of intoxication, someone who is under the influence of alcohol, drugs, or other intoxicants may be incapacitated and therefore unable to consent.
