MESSAGE FROM THE VICE PRESIDENT
FOR RESEARCH

Dear Colleagues,

As the new year gets under way, we take a moment to reflect on the accomplishments of the last year, and remind ourselves of our goals for the year ahead. The University at Albany’s expansion under the NYSUNY 2020 initiative continues to make progress. A feature of our NYSUNY2020 plan is the Emerging Technology and Entrepreneurship Complex (ETEC), which will bring together researchers, industry partners, entrepreneurs and investors to capitalize on the wealth of research and expertise here on campus. We welcome Michael Shimazu, Associate Vice President for Business Partnership and Economic Development, who is developing key partnerships and guiding the ETEC and STARTUP-NY initiatives at the University to realize their full potential.

With support from Governor Andrew Cuomo and the UAAlbany 2020 plan, we continue to build upon our leadership in extreme weather forecasting and emergency preparedness. Our expertise in Atmospheric and Environmental Prediction Innovation is creating one of the nation’s largest concentrations of climate researchers dedicated to addressing the global need for more precise weather and climate information. This endeavor leverages UAAlbany’s history of groundbreaking atmospheric science investigations and discoveries by merging the talent and resources of our internationally recognized programs in the Atmospheric Sciences Research Center and the Department of Atmospheric and Environmental Sciences in partnership with key stakeholders.

continued on page 2
with the National Weather Service, also located on campus, and the National Oceanic and Atmospheric Administration.

The Research Foundation for SUNY is providing $4 million to fund four Networks of Excellence within the SUNY system to encourage inter-institutional research and collaboration: SUNY 4E (Energy, Environment, Economics and Education), SUNY Health, SUNY Brain, and SUNY Materials and Advanced Manufacturing. The SUNY 4E Network, coordinated by UAlbany, Binghamton University and the SUNY College of Environmental Science and Forestry, will focus on research across the SUNY system related to energy and the environment with associated economic considerations and educational programming. UAlbany faculty are involved in the steering committees for each of the networks.

Finally, we are mindful that external sponsored funds provide the resources, environment and expertise that support UAlbany as a research intensive university. We are pleased to note that research funding has been obtained in many areas across the campus, including major grants such as a $21.5 million grant for the School of Social Welfare-led National Child Welfare Workforce Institute; nearly $600k from the U.S. Department of State for the Project on International Security, Commerce, and Economic Statecraft led by UAlbany political scientist Bryan Early; and a $400,000 grant from the National Science Foundation for research on characterizing "noise" in digital images or audio signals led by Siwei Lyu of the College of Computing and Information. The close of the Fall semester is the halfway mark of our fiscal year and a time to reflect on our sponsored funds activity for fiscal year 2014. The end of December closed out the second quarter where UAlbany grant applications remained stable at 235; 137 awards were booked for a total of $31.42 million in funding. Congratulations to our entire faculty who have obtained external funding.

Best wishes for a healthy and happy new year.

Sincerely,

James A. Dias, Ph.D.
Vice President for Research
Welcome to another edition of Coeus Corner.

We are still waiting for better weather though!

Our aim with Coeus has always been to help make the submission process as easy as possible for all users and to facilitate data sharing with all offices that support principal investigators in their research programs. Since all post-award offices now have access to the same proposal and award documents as the preaward office, we hope this will help to reduce the number of queries between offices and queries to PIs. Additionally, as questions relating to use of human or animal subjects or use of biohazardous materials, radioactive materials, etc. are answered in Coeus, the Office of Research Regulatory Compliance and the Environmental Health and Safety office are automatically notified by Coeus so they are informed of the PI's intentions/requirements for their project.

We would like to remind the Deans, Center Directors and Chairs, of the importance of completing the "Modify the Authorized Signatory List" form found on our website http://coeus.albany.edu. We cannot make any changes to the mapping in Coeus without written authorization. It is important to notify us as soon as you are aware of any signatory changes within your Department/Center or School to ensure that the proposals can be correctly routed to the authorized signatory and their alternates.

Throughout the year, we continually talk about our campus requirement that all faculty members must be trained and made ‘active’ in Coeus in order to obtain departmental approvals and subsequently submit proposals to the sponsor. We understand that everyone has busy schedules, and we continue to run weekly training sessions to accommodate this, but there has been a marked increase in demand for last minute training. We do our very best to try to help everyone, but please note, that if you wait until the last minute to be trained, we may not be able to train you in time for your proposal to be submitted.

In every issue we also stress the importance of not submitting proposals to OSP or the agencies at the last minute. In order for us to ensure on time submission and for you to have confidence that the application will arrive at the appropriate agency on time, you must submit your proposal for approval 5 days before the deadline. This allows departmental Chairs and Deans time to review and approve proposals, and the OSP office the necessary time to do its obligatory diligence to comply with all the new and ever-changing regulations. Please try to submit as early as you can to provide adequate time for the application to reach its destination and for corrections to be made in the event modifications are required by the department or the OSP office after the original submission. For those proposals being submitted system to system through Grants.gov, please also remember that Grants.gov states that we should allow 2 days for validations. So submitting at the last minute could mean rejection of that proposal by Grants.gov or the sponsor and then no time is left for corrections to be made.

Please remember that it is now a requirement for anyone submitting a proposal to a PHS agency, to file a PHS Conflict of Interest for EACH submission. Also note that an ANNUAL
UAAlbany/RFSUNY Conflict of Interest is also required, and for a PHS application both must be on file at the time of application. For all NON PHS applications, you must have a current UAAlbany/RFSUNY Conflict of Interest form on file with the Office for Sponsored Programs at the time of application.

**TRAINING**

Training classes continue to be offered for Coeus Navigation, Budgeting and Routing and Approval. Please use our website (http://www.albany.edu/osp/coeus_home.php) to see the schedule and register for classes for the spring.

We encourage any faculty not already trained to come to training as soon as you decide to submit a research proposal.

The Coeus Helpdesk is always there for your questions and comments. If you have problems or changes, please let us know. Please call your RA with any questions you might have and/or call us, or email the Coeus HelpDesk (coeushelp@albany.edu) which is monitored continually.

Stay warm and enjoy the semester!

---

**Happy New Year**

**2014**
Pivot brings the COS Funding Opportunities and the COS profile databases (Scholar Universe and COS Expertise) all together into a single integrated tool. Pivot allows users to search for a funding opportunity and instantly view matching faculty from inside and/or outside their institution. Your current COS Username and Password will gain you access to Pivot (http://pivot.cos.com). If you do not have a COS Username and Password, go to http://pivot.cos.com, click on Sign up and “create your Pivot Account”. If you forgot your COS password, click on Log-In/Login Help and “forgot your password”. Your email address must match the specified e-mail domain (albany.edu) in order to access Pivot.

Find Funding Now and for the Future

Pivot provides you with your own homepage to track your most important active funding opportunities or to keep an eye on opportunities for future projects. In addition, you can make the most of your time by saving your searches and receiving weekly alerts that meet your criteria.

Not sure where to start? Pivot helps to jump-start the process with the Funding Advisor, which matches funding to the profiles in Pivot. Claim or create your Pivot profile* to receive funding recommendations based on your experience and expertise. Funding matches provide a starting point for funding, and introduces opportunities, sponsors, topics, and keywords that can be used for your own searches.

*Note that newly created profiles are editorially vetted before being visible on Pivot.

Connect to Collaborators

Search for potential collaborators at your institution or beyond. Pivot provides user-friendly tools to refine your search that identify people you may not know. In addition, Pivot expedites the discovery process by presenting links from funding opportunities to find possible collaborators. Pivot makes it easy for you to share funding opportunities with colleagues and follow up on items you have shared. In short, Pivot connects you with funding as well as connecting you with other researchers.

If you have any questions about Pivot, please call
Linda Nuzback at 437-4559 or email Lnuzback@albany.edu
Research Foundation Announcement
SUNY Brain Network of Excellence Request for Proposal

The Research Foundation has announced the first “Request for Proposal” (RFP) for the SUNY Brain Network of Excellence. The Brain Network is designed to maximize diverse strengths in interdisciplinary neuroscience research across the SUNY campuses and facilitate partnerships with academia, industry, and the community. The technical scope of the Network encompasses fostering basic, translational and clinical research programs and partnerships that will create new knowledge and accelerate discovery in neuroscience research.

Required letters of intent are due by 5 pm on Friday, February 28, 2014 and will be reviewed throughout March 2014. Invitations to submit a full proposal will be sent to applicants by April 2014. A copy of the RFP and an updated list of Frequently Asked Questions (FAQ) can also be found on the SUNY Brain Network of Excellence webpage.

The Networks of Excellence were created to facilitate system-wide collaboration and partnerships, and to share expertise and assets for innovative advances in research. By bringing together the varied expertise disbursed across the state into collective networks, SUNY can excel as a prominent national and international scientific leader, grow the number of research applications and awards, and educate our next-generation workforce. Our goal is to assemble scientists and scholars from multiple campuses and industry and/or community partners to engage in joint programs of research that are competitive for external funding and to enhance experiential learning of students.

If you are interested in applying for this funding opportunity, please contact your Office for Sponsored Programs Research (OSP) Administrator http://www.albany.edu/osp/administrator.php.

National Institutes of Health
New Tools for Searching NIH-Funded Projects
http://projectreporter.nih.gov/reporter.cfm

The RePORTER on the Research Portfolio Online Reporting Tools website has been updated to enhance your search of NIH-funded projects. One such update, Matchmaker, is a new query interface where users can submit abstracts or other scientific text to find similar projects. Matchmaker also automatically creates charts of the most common peer review study sections, funding institutes and centers (ICs), and activity codes in your list of similar projects to help you narrow in on which study sections reviewed those projects and understand which NIH ICs fund similar work.

Note: Check the OSP website http://www.albany.edu/osp/successful-proposals.php to search for abstracts of successful proposals form other federal agencies.
UAlbany Fulbright Scholars

Congratulations to the 2013-2014 University at Albany Fulbright U.S. Scholars!

James Collins
Professor, Department of Anthropology
Project: After Apartheid and Jim Crow: A Framework for Examining Language Diversity, Civil Rights and Social Inequalities in South Africa and the United States
Host Institution: University of Cape Town
Country: South Africa
Dates: January 2014 – July 2014

David Fitzjarrald
Senior Research Associate, Atmospheric Sciences Research Center
Project: Landscape heterogeneity and Amazonian mesoclim ate: Fostering critical understanding of observations and model output
Host Institution: Federal University of Western Para
Country: Brazil
Dates: June 2014 – August 2014

Congratulations to the 2013-2014 University at Albany Fulbright Visiting Scholars!

Johanna Hakala
Head of Research Development
Faculty Associate: Dr. Jason Lane
Department: Educational Administration and Policy Studies
Project: Strategic Planning, Human Resources Management and Academic Leadership: Learning From Two Research Universities in the United States
Country: Finland
Dates: March 2013 – May 2013

Elmira Shishkaraeva
Instructor
Faculty Associate: Dr. Heinz-Dieter Meyer
Department: Educational Administration
Project: The Education System and Civil Society in Kyrgyzstan: Challenges and Perspectives for Public Education Reforms
Country: Kyrgyzstan
Dates: August 2013 - July 2014

The Fulbright competition for academic year 2015-2016 will open February 1, 2014. For more information, please visit http://catalog.cies.org/. To register your interest in the program, join the My Fulbright online community for updates and to access helpful resources for applicants: http://www.cies2.org/s/1064/index.aspx.
# Congratulations to our Recent Award Recipients

FACULTY FUNDING OPPORTUNITIES

For further information on any of the programs in this newsletter, please refer to the full program announcement provided at the web address listed at the end of each program announcement. If you are not able to access the information you would like, please email Lnuzback@albany.edu.

The deadline dates indicated refer to the date proposals are due at the sponsoring organization. Completed applications must be submitted for approval, using Coeus, FIVE BUSINESS DAYS before the sponsor deadline. This allows sufficient time for routing and approval by authorized signatories and leaves adequate time for any corrections with a submission to the sponsor.

If you decide to pursue a funding opportunity, it is critical that you contact the appropriate Program Officer to ensure that you have the latest information and application materials. We attempt to provide the most up-to-date information that is available, but this can change at any time.

MATHEMATICS, SCIENCES, AND SOCIAL SCIENCES

Agency for Healthcare Research and Quality (AHRQ)
AHRQ Conference Grant Program
AHRQ seeks to support conferences that help to further its mission to improve the quality, safety, efficiency, and effectiveness of health care for all Americans. The types of conferences eligible for support include: Research Development; Research Design and Methodology; Dissemination and Implementation Conferences; and Research Training, Infrastructure and Career Development. AHRQ is especially interested in supporting conferences that demonstrate strategies that include plans for disseminating complementary conference materials and products beyond the participants attending the event. Such strategies might include, but are not limited to, submitting articles for publication, posting information on a web site, and seeking formal opportunities to discuss conference information with others.
Deadline: May 1

American Cancer Society (ACS)
Institutional Research Grants
This grant is a block award to an institution that enables it to provide seed money for newly independent investigators to initiate research projects. The intent is to support junior faculty in initiating cancer research projects so they can obtain preliminary results that will enable them to compete successfully for national research grants.
Deadline: April 1
http://www.cancer.org/research/applyforaresearchgrant/granttypes/institutional-research-grants
American Cancer Society (ACS)
Pilot and Exploratory Projects in Palliative Care of Cancer Patients and Their Families

Development of the specialty of palliative medicine is a critical step in addressing the unmet needs of patients with serious illness and their families. This RFA provides funding for investigators performing pilot and exploratory research studies whose purpose is to test interventions, develop research methodologies, and explore novel areas of research in palliative care of cancer patients and their families. A condition of funding is a clearly defined plan as to how the investigator will use the results of the project to develop larger, extramurally funded research projects.

**Deadline:** April 1

American Cancer Society (ACS)
Research Scholar Grants

Independent investigators in the first six years of an independent research career or faculty appointment are eligible to apply for support of investigator-initiated projects across the cancer research continuum. Awards are for up to four years.

**Deadline:** April 1
http://www.cancer.org/research/applyforaresearchgrant/granttypes/research-scholar-grants

American Cancer Society (ACS)
The Role of Healthcare and Insurance in Improving Outcomes in Cancer Prevention, Early Detection and Treatment

The purpose of this grant is to stimulate research that will generate new knowledge of the effects of the U.S. healthcare system structure and the role of insurance on both access to and outcomes of cancer screening, early detection and treatment services. Studies investigating how one or more factors impacting access and outcomes interact – such as insurance status, costs, capacity, personal characteristics, provider characteristics, components of the healthcare delivery system and other known factors – are encouraged.

**Deadline:** April 1

National Cancer Institute (NCI)
Cancer Education Grants Program (R25)

The purpose of this opportunity is to support innovative educational efforts that would help to reduce cancer incidence, morbidity, and mortality, and that would improve the quality of life of cancer patients.

**Deadline:** May 25

Eunice Kennedy Shriver National Institute of Child Health and Human Development
Ruth L. Kirschstein National Research Service Award (NRSA) Institutional Predoctoral Training Program in Systems Developmental Biology

The objective of this program is to provide research training to predoctoral students interested in establishing research careers that use systems biology approaches to study developmental biology and the formation of structural birth defects.

**Deadline:** April 25, Letter of Intent – May 25, Full Application
National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) Prevention and Treatment of Obesity, Diabetes, and Chronic Kidney Disease in Military Populations

The goal of this opportunity is to encourage research project grant applications on prevention and treatment of obesity, diabetes, and chronic kidney disease in military personnel (active duty and retired) and their families.

**Deadline:** May 13, Letter of Intent – June 13, Full Application

National Institutes of Health (NIH) Shared Instrumentation Grant Program

The ORIP Shared Instrument Grant (SIG) program encourages applications from groups of NIH-supported investigators to purchase or upgrade a single item of expensive, specialized, commercially available instrumentation or an integrated system that costs at least $100,000. The maximum award is $600,000. Types of instruments supported include, but are not limited to, confocal and electron microscopes, biomedical imagers, mass spectrometers, DNA sequencers, biosensors, cell-sorters, X-ray diffraction systems, and nuclear magnetic resonance (NMR) spectrometers among others.

**Deadline:** March 21

National Science Foundation (NSF) Antarctic Artists and Writers Program

This program provides opportunities for artists and writers—whether promising early career practitioners or those of longstanding professional reputation and accomplishment—to make the observations at US Antarctic Program research stations and field camps or aboard ships necessary to completing their projects as envisioned and as described in their proposals.

**Deadline:** May 1

National Science Foundation (NSF) Antarctic Research

The Antarctic Sciences Section supports research that expands fundamental knowledge of the region as well as research that relies on the unique characteristics of the Antarctic continent as a platform from which to support research. Antarctic fieldwork will only be supported for research that can only be performed or is best performed in Antarctica.

**Deadline:** April 15

National Science Foundation (NSF) NSF-CBMS Regional Research Conferences in the Mathematical Sciences

The NSF-CBMS Regional Research Conferences in the Mathematical Sciences are a series of five-day conferences each of which features a distinguished lecturer delivering ten lectures on a topic of important current research in one sharply focused area of the mathematical sciences. CBMS refers to the Conference Board of the Mathematical Sciences which publicizes the conferences and administers the resulting publications. Support is provided for about 30 participants at each conference. Proposals should address the unique characteristics of the NSF-CBMS conferences, outlined in the Program Description.

**Deadline:** April 25
National Science Foundation (NSF)
**Coupling, Energetics, and Dynamics of Atmospheric Regions (CEDAR)**
CEDAR is a broad-based, community-initiated, upper atmospheric research program. The goal is to understand the behavior of atmospheric regions from the middle atmosphere upward through the thermosphere and ionosphere into the exosphere in terms of coupling, energetics, chemistry, and dynamics on regional and global scales. These processes are related to the sources of perturbations that propagate upward from the lower atmosphere as well as to solar radiation and particle inputs from above.
**Deadline:** May 12
http://www.nsf.gov/funding/pgm_summ.jsp?pims_id=5503

National Science Foundation (NSF)
**Dimensions of Biodiversity FY2014**
The goal of the Dimensions of Biodiversity campaign is to transform, by 2020, how we describe and understand the scope and role of life on Earth. The campaign promotes novel, integrated approaches to identify and understand the evolutionary and ecological significance of biodiversity amidst the changing environment of the present day and in the geologic past. This campaign seeks to characterize biodiversity on Earth by using integrative, innovative approaches to fill the most substantial gaps in our understanding of the diversity of life on Earth. It takes a broad view of biodiversity, and currently focuses on the integration of genetic, taxonomic/phylogenetetic, and functional dimensions of biodiversity. Successful proposals should integrate these three dimensions to understand interactions and feedbacks among them.
**Deadline:** April 3

National Science Foundation (NSF)
**Macrosystems Biology**
Proposals are invited from interdisciplinary teams of scientists to conduct innovative, integrated, systems-oriented "macrosystems biology" research to detect, understand and forecast the consequences of climate and land use change and invasive species on the biosphere at regional to continental scales. Proposals should address the scales where the ecological research challenges are the greatest and where research has the greatest potential to transform the field of ecology by addressing scaling issues that have long hindered development of large-scale ecology.
**Deadline:** April 7

Whitehall Foundation
**Research Grants and Grant-in-Aid**
It is the Foundation's policy to assist those dynamic areas of basic biological research that are not heavily supported by Federal Agencies or other foundations with specialized missions. The Foundation emphasizes the support of young scientists at the beginning of their careers and productive senior scientists who wish to move into new fields of interest. The Foundation is currently interested in basic research in neurobiology, defined as follows: Invertebrate and vertebrate (excluding clinical) neurobiology, specifically investigations of neural mechanisms involved in sensory, motor, and other complex functions of the whole organism as these relate to behavior. The overall goal should be to better understand behavioral output or brain mechanisms of behavior.
**Deadline:** April 15, Letter of Intent – September 1, Full Application
http://www.whitehall.org/grants/
ECONOMICS AND BUSINESS

IBM Center for the Business of Government Research Report Stipends

The aim of this Center is to tap into the best minds in academe and the nonprofit sector who can use rigorous public management research and analytic techniques to help public sector executives and managers improve the effectiveness of government. They are looking for very practical findings and actionable recommendations in order to assist executives and managers to more effectively respond to mission and management challenges.

Deadline: April 1
http://www.businessofgovernment.org/content/research-report-stipends-0

Institute of Management Accountants Research Grant Program

The Foundation encourages submission of innovative research proposals in the area of accounting and finance by both academics and practitioners. The proposals should clearly communicate the purpose and scope of the proposed research project and how it relates to primary management accounting activities such as decision support, planning, and control.

Deadline: Continuous

National Science Foundation (NSF) Innovation Corps Teams Program (I-Corps Teams)

The goals of this program are to spur translation of fundamental research to the marketplace, to encourage collaboration between academia and industry, and to train NSF-funded faculty, students and other researchers to understand innovation and entrepreneurship. The purpose of the I-Corps Teams program is to identify NSF-funded researchers who will receive additional support - in the form of mentoring and funding - to accelerate the translation of knowledge derived from fundamental research into emerging products and services that can attract subsequent third-party funding.

Deadline: June 15

United States Department of Commerce, Economic Development Administration (EDA) Planning Program and Local Technical Assistance Program

Under the Planning program EDA assists eligible recipients in creating regional economic development plans designed to stimulate and guide the economic development efforts of a community or region. As part of this program, EDA supports Partnership Planning investments to facilitate the development, implementation, revision, or replacement of Comprehensive Economic Development Strategies (CEDS), which articulate and prioritize the strategic economic goals of recipients' respective regions.

Deadline: Continuous
http://www.grants.gov/search/search.do;jsessionid=3NkJQcGTZnfhZBkDQq528TyvGLdqyNdCSLPTMKNyXMcSkGsbRpJkJ!579898676?oppId=189193&mode=VIEW
National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK)
NIDDK Education Program Grants (R25)
   This funding opportunity announcement encourages Research Education grant applications from applicant organizations that propose to create educational opportunities for undergraduate students, graduate students, and postdoctoral fellows in areas of biomedical or behavioral research of particular interest to the NIDDK, while fostering the career development of these students and fellows.
   Deadline: May 25

Spencer Foundation
Field-Initiated Proposals
   The proposal must address explicitly how the proposed study aligns with the Foundation's mission of research toward educational improvement, and answers the question whether this proposal promises to advance the Foundation’s purposes more effectively than research that can be funded in the declared areas.
   Deadline: Continuous for Major Grant Preliminary Proposals – February 13 for Small Grants
   http://www.spencer.org/content.cfm/field-initiated-proposals

Spencer Foundation
Philosophy in Educational Policy and Practice
   Applications are encouraged to understand educational policy and practice in broad terms, including issues that directly relate to K-12 schools and higher education institutions, but also concerning policies that influence children’s growth and development in the family and in other areas of social life including children’s upbringings, educational issues in family life and in the workplace, the educational effects of welfare policy.
   Deadline: Continuous
   http://www.spencer.org/content.cfm/philosophy-in-educational-policy-practice

Spencer Foundation
Purposes and Values of Education
   The foundation values education for its contributions to civic, political, and community life, for its role in advancing social justice, for its capacity to open to people worlds of cultural and artistic excellence, and in the largest sense for its contributions to "human flourishing."
   Deadline: Continuous for Major Grant Preliminary Proposals – February 13 for Small Grants
   http://www.spencer.org/content.cfm/purposes-and-values-of-education

Spencer Foundation
Teaching, Learning, and Instructional Resources
   Concerned with advancing the learning and development of children and adults, Spencer is interested in studies that lead to better understanding and improvements in the intellectual, material, and organizational resources that contribute to successful teaching and learning. A key aim of research in this initiative is to support investigations of questions that are grounded directly in teaching practice as well as in research about important aspects of teaching and learning processes that hold promise for enriching opportunities to learn and for guiding informed policymaking.
   Deadline: Continuous for Major Grant Preliminary Proposals – February 10 for Small Grants
   http://www.spencer.org/content.cfm/teaching-learning-and-instructional-resources
HUMANITIES AND FINE ARTS

American Historical Association
J. Franklin Jameson Fellowship in American History
This fellowship in American History is offered annually by the Library of Congress and the American Historical Association to support significant scholarly research in the collections of the Library of Congress by scholars at an early stage in their careers in history.
Deadline: April 1

American Musicological Society (AMS)
The Music in American Culture Award
Each year the Music in American Culture Award honors a book of exceptional merit that both illuminates some important aspect of the music of the United States and places that music in a rich cultural context. The goal of this award is to recognize the best writing on music in American culture, regardless of the source or intended audience of that writing; hence work by a broad range of authors—including performing musicians, journalists, and music critics, as well as academic scholars—will be considered. Books published in the previous year (2012) in any language and in any country are eligible.
Deadline: May 1
http://www.ams-net.org/awards/MACA.php

The Gilder Lehrman Institute of American History
Fellowships
Short-term research fellowships are offered to doctoral candidates, postdoctoral scholars, college and university faculty at every rank, and independent scholars working in American history. Up to ten fellowships will be awarded to scholars to conduct research within the archival holdings of any institution in the five boroughs of New York City.
Deadline: May 1
http://www.gilderlehrman.org/programs-exhibitions/fellowships

Modern Language Association (MLA)
Modern Language Association Prize for Independent Scholars
This award will be presented to an author of a distinguished scholarly book published in 2012 or 2013 in the field of English or another modern language or literature. The prize will consist of a cash award, a certificate, and a one-year membership in the association.
Deadline: May 1
http://www.mla.org/resources/awards/awards_submissions/awards_competitions/prizes_annual_2003/prizeinfo indsch

National Endowment for the Humanities (NEH)
Fellowships
Fellowships support individuals pursuing advanced research that is of value to humanities scholars, general audiences, or both. Recipients usually produce articles, monographs, books, digital materials, archaeological site reports, translations, editions, or other scholarly resources in the humanities. Projects may be at any stage of development.
Deadline: May 1
http://www.neh.gov/grants/research/fellowships
National Endowment for the Humanities (NEH)
Fellowships for Advanced Social Science Research on Japan
Awards support research on modern Japanese society and political economy, Japan's international relations, and U.S.-Japan relations. The program encourages innovative research that puts these subjects in wider regional and global contexts and is comparative and contemporary in nature. Research should contribute to scholarly knowledge or to the general public's understanding of issues of concern to Japan and the United States. Appropriate disciplines for the research include anthropology, economics, geography, history, international relations, linguistics, political science, psychology, public administration, and sociology. Fellows may undertake their projects in Japan, the United States, or both, and may include work in other countries for comparative purposes. Projects may be at any stage of development.
Deadline: May 1
http://www.neh.gov/grants/research/fellowships-advanced-social-science-research-japan

National Institutes of Health (NIH)
International Research Ethics Education and Curriculum Development Award
This program’s goal is strengthen research ethics capacity in low- and middle-income countries through increasing the number of scientists, health professionals and relevant academics from these countries with in-depth knowledge of the ethical principles, processes and policies related to international clinical and public health research as well as the critical skills to develop research ethics education, ethical review leadership and expert consultation to researchers, their institutions, governments and international research organizations.
Deadline: April 22, Letter of Intent – May 22, Full Application

National Science Foundation (NSF)
Catalyzing New International Collaborations (CNIC)
The CNIC program will support US researchers’ participation in activities intended to catalyze new international collaborations designed to open up new scientific directions for the proposer. These include, but are not limited to: research planning visits, initial data gathering activities, proof-of-concept, single or multiple visits within a maximum 12-month time period to plan a new international research collaboration, or exploratory workshops designed to bring together US and non-US-based researchers representing several institutions and focused on a topic specified in the Project Description.
Deadline: April 22

The Wenner-Gren Foundation
International Collaborative Research Grants
This program supports international research collaborations between two or more qualified scholars, where the principal investigators bring different and complementary perspectives, knowledge, and/or skills to the project. By encouraging international collaborations, the grant contributes to the development of an international anthropology that values and incorporates different national perspectives and resources.
Deadline: June 1
http://www.wennergren.org/programs/international-collaborative-research-grants
WOMEN AND MINORITIES

Association for Women in Mathematics (AWM)

Travel Grants for Women Researchers (NSF-AWM Travel Grants)

The objective of the grants is to enable women to attend research conferences in their fields, thereby providing a valuable opportunity to advance their research activities and their visibility in the research community. Having more women attend such meetings also increases the size of the pool from which speakers at subsequent meetings may be drawn and thus addresses the persistent problem of the absence of women speakers at some research conferences. Two types of travel grants are available. The Mathematics Travel Grants provide full or partial support for travel and subsistence for a meeting or conference in the applicant's field of specialization. The conference or the applicant's research must be in an area supported by the Division of Mathematical Sciences (DMS) of the National Science Foundation.

Deadline: May 1

University at Albany, SUNY

Initiatives for Women (IFW)

Initiatives For Women benefits women students, faculty, and staff and the University at Albany and our community as a whole by providing them the means to advance their educational and professional goals. The IFW awards generally range from $500 to $2,000 depending on need. Any woman who is a University employee (faculty or staff) or registered student (undergraduate or graduate) at the University is eligible to apply. In addition, University at Albany campus groups may apply for funds for programs that support women's concerns or the needs of women on campus.

Deadline: March 7
http://www.albany.edu/ifw/

Women’s Studio Workshop (WSW)

Studio Residency

Women's Studio Workshop offers a six- to eight-week residency for an artist working in intaglio, papermaking, letterpress printing, book arts, or ceramics. This residency supports the creation of a new body of work in one of WSW's studio disciplines. The grant includes a $350 per week stipend, up to $500 for materials to be used for the project at WSW, travel stipend, housing and unlimited studio use.

Deadline: April 1
http://wsworkshop.org/_art_opp/artopp_grant_studiores.htm
American Music Therapy Association (AMTA)
Arthur Flagler Flutz Research Award

The purpose of the award is to encourage, promote and fund music therapy research and to explore new and innovative music therapy treatments. The fund seeks to support research in the field of music therapy in the following areas: Clinical Research - To assess the efficacy of music therapy interventions and to help define best practice; and Health Services Research - To assess the role of music therapy practice in the context of emerging health care delivery models.

Deadline: May 2
http://www.musictherapy.org/research/fultz/

Council for International Exchange of Scholars (CIES)
Fulbright Senior Specialist Grants

Fulbright Specialist projects are designed to provide U.S. faculty and professionals with opportunities to collaborate with professional counterparts at non-U.S. post-secondary academic institutions on curriculum and faculty development, institutional planning and a variety of other activities. CIES builds lists of qualified Specialist candidates for each eligible discipline and facilitates matching Specialist candidates with project requests. Applications for the Fulbright Senior Specialists Program are accepted on a rolling basis, and peer review of applications is conducted eight times per year.

Deadline: Continuous
http://www.cies.org/specialists/

Google
Google Research Awards: Faculty Research Awards

The intent of the Awards is to support cutting-edge research in Computer Science, Engineering, and related fields (awards tend to fund projects that are highly technical in nature). Through the program, the company tries to fund projects where collaboration with the company will be especially valuable to the research team. The program is designed to support work whose output will be made available to the public and to the research community.

Deadline: April 15
http://research.google.com/university/relations/research_awards.html

Library of Congress
Kluge Fellowships

The Kluge Center especially encourages humanistic and social science research that makes use of the Library's large and varied collections. Interdisciplinary, cross-cultural, or multi-lingual research is particularly welcome. Among the collections available to researchers are the world's largest law library and outstanding multi-lingual collections of books and periodicals. Deep special collections of manuscripts, maps, music, films, recorded sound, prints and photographs are also available.

Deadline: July 15
http://www.loc.gov/loc/kluge/fellowships/kluge.html
James S. McDonnell Foundation (JSMF)

Studying Complex Systems – 21st Century Science Collaborative Activity Awards

The Complex Systems program supports scholarship and research directed toward the development of theoretical and mathematical tools that can be applied to the study of complex, adaptive, nonlinear systems. It is anticipated that research funded in this program will address issues in fields such as biology, biodiversity, climate, demography, epidemiology, technological change, economic development, governance, or computation. The JSMF Scholar Awards are designed to support research with a high probability of generating new knowledge and insights.

**Deadline:** March 13
http://www.jsmf.org/apply/scholar-cs/

National Institute on Aging (NIA)

Behavioral and Social Genomics of Aging: Opportunities in the Health and Retirement Study

This opportunity encourages applications taking advantage of the newly available genetic data, for new and innovative research purposes, to advance the understanding of how genetic, behavioral, and psychosocial factors affect the health and well-being of older Americans.

**Deadline:** June 5

National Institute on Aging

Regional and International Differences in Health and Longevity at Older Ages

This Funding Opportunity Announcement (FOA) encourages Research Project Grant applications from institutions/organizations proposing to advance knowledge on the reasons behind the divergent trends that have been observed in health and longevity at older ages, both across industrialized nations and across geographical areas in the United States. This opportunity is intended to capitalize on provocative findings in the literature which have been insufficiently understood and addressed. It is also intended to capitalize on NIA’s investment in the development of cross-nationally comparable datasets that can be harnessed to study these research questions; these include the Health and Retirement Study (HRS), the English Longitudinal Study on Ageing (ELSA), the Survey of Health, Ageing and Retirement in Europe (SHARE), and the Human Mortality Data Base.

**Deadline:** June 5

National Institutes of Health (NIH)

Health Services and Economic Research on the Prevention and Treatment of Drug, Alcohol, and Tobacco Abuse

This funding opportunity encourages applications on health services and economic research to improve the quality of prevention, treatment, and recovery support services for drug, alcohol and tobacco abuse. Such research projects might emphasize any of the following subjects: Clinical quality improvement; Organization and delivery of services; Implementation research; Economic and cost studies; and Development or improvement of research methodology, analytic approaches, and measurement instrumentation used in the study of drug, alcohol, and tobacco prevention, treatment, and recovery services.

**Deadline:** June 5
National Institutes of Health (NIH)
Mentored Quantitative Research Development Award
The purpose of this award is to attract to NIH-relevant research those investigators whose quantitative science and engineering research has thus far not been focused primarily on questions of health and disease. The K25 award will provide support and “protected time” for a period of supervised study and research for productive professionals with quantitative (e.g., mathematics, statistics, economics, computer science, imaging science, informatics, physics, chemistry) and engineering backgrounds to integrate their expertise with NIH-relevant research.
Deadline: June 12

National Science Foundation (NSF)
Cyber-Innovation for Sustainability Science and Engineering (CyberSEES)
This solicitation aims to advance computing and information sciences research and infrastructure in tandem with other disciplines to develop analyses, methods, prototypes, and systems that lead to an increased understanding of sustainability and to solutions to sustainability challenges. Proposals are expected to forge interdisciplinary collaborations among the computer and information sciences, social and natural sciences, geosciences, mathematical sciences, engineering, and associated cyberinfrastructure to address challenging sustainability problems.
Deadline: April 8

National Science Foundation (NSF)
Data Infrastructure Building Blocks (DIBBs)
The DIBBs program encourages development of robust and shared data-centric cyberinfrastructure capabilities to accelerate interdisciplinary and collaborative research in areas of inquiry stimulated by data. There are two classes of awards: Pilot Demonstration projects should address broad community needs of interest to a large number of researchers within a research domain, or extending beyond that to encompass other disciplines. Early Implementation projects are expected to be of interest to multiple research communities in multiple scientific and engineering domains; these projects will develop frameworks that provide consistency or commonality of design across communities, ensuring that existing conventions and practices are appropriately recognized and integrated, and, most importantly, that the real needs of the community are identified and met.
Deadline: April 9

National Science Foundation (NSF)
Partnerships for Innovation: Accelerating Innovation Research-Technology Translation
This solicitation is intended to help bridge the funding gap between existing research discoveries that validate relevant science and engineering fundamentals and their translation through proof-of-concept, prototype, or scale-up along a path toward commercialization and engage faculty and students in entrepreneurial/innovative thinking. At least one co-PI must have explicit business experience (for example, someone from the technology transfer office, the business school or a local/regional development office) and must have an active role that is explicitly described along with the specification of a time commitment on the project.
Deadline: March 13, Letter of Intent – May 1, Full Application
American Cancer Society (ACS)
Postdoctoral Fellowships
This award is to support the training of researchers who have received a doctoral degree to provide initial funding leading to an independent career in cancer research (including basic, preclinical, clinical, cancer control, psychosocial, behavioral, epidemiology, health services and health policy research).
**Deadline:** April 1
http://www.cancer.org/research/applyforaresearchgrant/granttypes/postdoctoral-fellowships

Cancer Research Institute (CRI)
Irvington Institute Fellowship Program of the Cancer Research Institute
The institute funds research to further the development of immunological approaches to the diagnosis, treatment, and prevention of cancer. The fellowship program was established to foster the training of qualified immunologists at leading medical schools and research centers around the world.
**Deadline:** April 1
http://www.cancerresearch.org/programs/research/fellowship/apply.html

L.S.B. Leakey Foundation
General Research Grants
These grants fund research related specifically to human origins, including paleoanthropology, primate behavior, and studies of modern hunter-gatherer groups. The majority of the Foundation’s Research Grants to doctoral student are in the $3,000-$13,500 range; however, larger grants, especially to senior scientists and post-doctoral students, may be funded up to $22,000.
**Deadline:** July 15
http://www.leakeyfoundation.org/?option=com_content&view=article&id=11227

National Science Foundation (NSF)
American Competitiveness in Chemistry-Fellowship (ACC-F)
This program supports postdoctoral students in chemistry for two years of postgraduate study. It seeks to build ties between academic and industrial, and/or national laboratory, and/or NSF Chemistry Division-funded center researchers (affiliates); and involve beginning scientists in efforts to broaden participation in chemistry. Fellows will pursue research with industrial, and/or national laboratory, and/or NSF Chemistry Division-funded center partners that will enrich their in-house research program. In addition, fellows will develop and implement their own plans for broadening participation in the chemical sciences. The research must be in a thematic area that is supported by the NSF Division of Chemistry.
**Deadline:** April 7
**National Science Foundation (NSF)**

**NSF Earth Sciences Postdoctoral Fellowships**

Postdoctoral Fellowships are awarded to recent recipients of doctoral degrees for research and training in topics relevant to Earth sciences. The fellows must develop and implement research projects that seek to address scientific questions within the purview of EAR programs; and plans to broaden participation in Earth sciences. The program supports researchers for a period of up to 2 years with fellowships that can be taken to the institution of their choice (including facilities abroad). The program is intended to recognize beginning investigators of significant potential, and provide them with research experience, mentorship, and training that will establish them in leadership positions in the Earth Sciences community.  
**Deadline:** July 18  

**National Science Foundation (NSF)**

**Science, Technology, and Society (STS)**

This program supports scientific research that examines relationships between science (including engineering), technology, and society. Effective STS proposals explain how the proposed research provides new and important scientific insights into the theory or practice of science (or engineering) or into the adoption, use, or diffusion of technology. They also explain how the proposed research would bring to light the underlying assumptions, practices, methods, values, or goals of science, engineering, or technology. **Postdoctoral fellowships** support researchers within five years of receipt of the Ph.D. in order to enhance their methodological skills and research competence.  
**Deadline:** August 1  

**The Wenner-Gren Foundation**

**Hunt Postdoctoral Fellowships**

These fellowships support the writing-up of already completed research. The fellowship is awarded to scholars in the earlier stages of their careers with a Ph.D. in hand for no more than ten years (from the application deadline). The Foundation supports research that demonstrates a clear link to anthropological theory and debates, and promises to make a solid contribution to advancing these ideas. There is no preference for any methodology, research location, or subfield. The Foundation particularly welcomes proposals that employ a comparative perspective, can generate innovative approaches or ideas, and/or integrate two or more subfields.  
**Deadline:** May 1  
http://www.wennergren.org/programs/hunt-postdoctoral-fellowships

**Helen Hay Whitney Foundation**

**Postdoctoral Research Fellowships**

The Helen Hay Whitney Foundation supports early postdoctoral research training in all basic biomedical sciences. To attain its ultimate goal of increasing the number of imaginative, well-trained and dedicated medical scientists, the foundation grants financial support of sufficient duration to help further the careers of young men and women engaged in biological or medical research. The foundation expects that fellowship training will be obtained in an academic setting.  
**Deadline:** July 1  
http://www.hhwf.org/HTMLSrc/ResearchFellowships.html
**LIMITED SUBMISSIONS**

**Procedure to Follow for Limited Submissions**
(November 19, 2009)

The University at Albany requires an internal review and selection process for funding opportunities where the program guidelines stipulate a **limited number** of pre-proposal or proposal submissions. In order to select the best qualified proposal, applicants must follow the University’s Limited Submission Process.

As limited submission funding opportunities are posted to the website, an email will be sent to the appropriate faculty, chair, and or dean. An internal deadline will be given for interested applicants to submit a one page summary of their anticipated project to the Dean of their School/College. If the submission is for a major piece of shared equipment or shared core facilities, a business plan for supporting on-going operations and maintenance is also required.

In cases where the guidelines stipulate a specific number per college/school, the dean will be asked to coordinate the process within their college/school. When guidelines indicate a limited number per institution, the process will begin at the college/school level. In those cases, a deadline will be given for applicants to submit a one page summary to the dean. The dean will then submit recommendations along with the applicant's one page summary, by a specified deadline, to Lnuzback@albany.edu. Dr. James A. Dias, Vice President for Research, will make the final selection in consultation with the relevant dean(s) and notify the PI.

*Deans please NOTE: email Limited Submission recommendations and applicant’s one page summary to Lnuzback@albany.edu by the deadline indicated.

**Selective Current Funding Opportunities Requiring Limited Submission**

*Note: This is not an inclusive list of Limited Submissions*

National Science Foundation (NSF)
*Alliances for Graduate Education and the Professoriate (AGEP)*
Transformation Only
Deadlines:
College/School – December 9, 2013
Lnuzback@albany.edu - December 16, 2013
Sponsor – February 5, 2014

Blavatnik Family Foundation
*Regional Postdoctoral Competition-Nominations*
Deadlines:
Lnuzback@albany.edu - December 27, 2013
Sponsor – January 31, 2014
Letters of Recommendation - February 14, 2014

National Institute of Environmental Health Sciences (NIEHS)
*Superfund Hazardous Substance Research and Training Program*
Deadlines:
College/School – January 20, 2014
Lnuzback@albany.edu - January 27, 2014
Letter of Intent to Sponsor – March 10, 2014

GRADUATE FUNDING OPPORTUNITIES

Academy of Management
SHRM Foundation Dissertation Grants
The Society for Human Resource Management (SHRM) Foundation Dissertation Grants are given to four promising researchers in the field of human resource management at the dissertation stage of their doctoral education.
Deadline: May 1
http://www.hrdiv.org/hrdivision/awards/shrm.html

American Marketing Association Foundation (AMAF)
Valuing Diversity Ph.D. Scholarships
Through its Valuing Diversity Ph.D. Scholarship Program, the AMAF seeks to widen the opportunities for underrepresented populations to attend marketing doctoral programs. For the academic year, several $1,000 scholarships will be granted to students currently enrolled in Ph.D. programs.
Deadline: May 1 last year’s deadline (check website for updates)
http://www.themarketingfoundation.org/valuing_diversity.html

American Museum of Natural History (AMNH)
Anthropology Internship Program
The Anthropology Internship Program offers internships for undergraduate and graduate students interested in careers in anthropology, museums or related fields. Anthropology interns work on projects relating to the collections or to the ongoing research interests of the curatorial staff in the museum or in the field.
Deadline: April 1
http://research.amnh.org/anthropology/about/internship

American Physical Society (APS)
Marshall N. Rosenbluth Outstanding Doctoral Thesis Award
This award consists of $2,000, a certificate, and $500 travel allowance to attend the Annual Meeting where exceptional young scientists who have performed original thesis work of outstanding scientific quality and achievement in the area of plasma physics are recognized.
Deadline: April 1

American Society for Microbiology (ASM)
Robert D. Watkins Graduate Research Fellowship
The goal of the fellowship is to increase the number of underrepresented groups completing doctoral degrees in the microbiological sciences. The ASM Robert D. Watkins Graduate Research Fellowship is aimed at highly competitive graduate students who are enrolled in a Ph.D. program and who have completed their graduate course work in the microbiological sciences. The fellowship encourages students to continue and complete their research project in the microbiological sciences.
Deadline: May 1
http://www.asm.org/index.php/component/content/article/25-education/students/164-asm-robert-d-watkins-graduate-research-fellowship
American Society for Quality (ASQ)
Richard A. Freund International Scholarship
This scholarship is for graduate study of the theory and application of quality control, quality assurance, quality improvement, and total quality management. It covers the engineering, statistical, managerial, and behavioral foundations of those fields. Study may take place in the recipient’s own country or in another country. Concentration must be in quality control, quality assurance, quality improvement, total quality management or similar quality emphasis.
Deadline: April 1
http://www.asq.org/about-asq/awards/freundscholar.html

National Association of Social Workers (NASW)
Jane B. Aron Doctoral Fellowship (Jane Baerwald Aron Doctoral Fellowship Program)
One fellowship of up to $4,000 will be awarded in the 2014-2015 academic year to a social work doctoral candidate whose dissertation focuses on health policy and practice. Dissertations that include a diversity component are encouraged.
Deadline: March 5
http://naswfoundation.org/aron.asp

Sociologists for Women in Society (SWS)
Esther Ngan-ling Chow and Mareyjoyce Green Scholarship
The primary purposes of the scholarship are to offer support to female scholars who are from underrepresented groups and are studying concerns that women of color face domestically and/or internationally; and to increase the participation of students of color in SWS. Students must be in the early stages of writing a dissertation, and the dissertation must be sociologically relevant scholarship that addresses the concerns of Women of Color, domestically and/or internationally.
Deadline: April 1

University and Community College System of Nevada Desert Research Institute (DRI)
Peter B. Wagner Memorial Award for Women in Atmospheric Sciences
The award is a memorial scholarship to provide promising women graduate students in atmospheric sciences a cash award to further their professional careers. The award will be based on a paper competition and awarded to a woman pursuing a master's or Ph.D. in atmospheric sciences or a related program at a university in the United States. The submitted paper must be based on original research directly related to the identification, clarification, or resolution of an atmospheric or climatic problem.
Deadline: April 15

The Wenner-Gren Foundation
Dissertation Fieldwork Grants
The Foundation supports research that demonstrates a clear link to anthropological theory and debates, and promises to make a solid contribution to advancing these ideas. There is no preference for any methodology, research location, or subfield. The Foundation particularly welcomes proposals that employ a comparative perspective, can generate innovative approaches or ideas, and/or integrate two or more subfields.
Deadline: May 1
