Assistant Professor of Physics

The Physics Department at the University at Albany, State University of New York, invites applications for two tenure-track faculty positions starting in Fall 2014.

Assistant Professor in Particle Astrophysics and Cosmology
We seek an outstanding experimentalist or theorist with significant accomplishments who will benefit from the vigorous experimental and theoretical particle physics programs in the Physics Department, and the information physics group.

Assistant Professor in Experimental Imaging/Spectroscopic and Computational Physics
We seek outstanding applicants with expertise in experimental spectroscopic or imaging physics. Interest in computational/Bayesian/Information-theoretic methods is preferred. Desirable candidates will be able to collaborate with existing programs in physics, such as EPR, x-ray optics, robotics, astrophysics, or at the university, such as the RNA Institute, computational and chemical forensics, big data, genomics, and the Wadsworth Laboratory of the NYS Department of Health.

Requirements for both positions include a Ph.D. in Physics or related field and demonstrated scholarly productivity. Successful candidates will be committed to excellence in teaching at all levels and expected to develop a vigorous and externally funded research program. Review of applications will begin on December 15, 2013 and continue until the position is filled, with interviews expected to occur in the spring. See albany.edu/physics for more information.

The University at Albany is an EO/AA/IRCA/ADA employer.
We have a strong commitment to the affirmation of diversity.
