Waiver Information
Department of Public Administration and Policy
Fall 2013

Math Refreshers
If you are a continuing student, have already taken RPAD 503, 504, or 505 and received a B or higher, you do not need to take any math refreshers. However, you are welcome to attend the math sessions if you feel you need a refresher. If you are a new student, your math diagnostic exam score will determine whether you receive a waiver for one or all the math refresher workshops.

Excel
A diagnostic exercise is posted on Welcome Week Central. It can be located by going to the Workshops tab, and clicking the class assignment link. The diagnostic includes the first and second documents in folder. If you can complete this exercise without help, you do not need to attend the Excel workshop.

Resume Writing/Internship Basics
If you are a continuing student and have already completed your internship requirement, you do not need to attend this workshop. If you are a new student and have at least 2 years of professional experience, you can seek an Internship waiver from Jen Williams-McLaughlin on Monday (8/19) or Wednesday (8/21). If you receive an Internship waiver, you are also exempt from this workshop.

Welcome Week
Welcome Week can only be waived by speaking with Kara Pangburn, please contact her if you have a conflict.

507/508
Please see the separate document posted under the Miscellaneous tab for more information.
