Note: "Demand reduction" refers to programs and research related to drug abuse treatment and prevention that are designed to reduce the demand for drugs. "Supply reduction" refers to a wide scope of law enforcement-related activities designed to reduce the supply of drugs.

The fiscal year 2005 national drug control budget reflects a restatement of reporting for 1996-2004 to reflect the removal of the Byrne Grant program. The Byrne program funding was removed from the drug control budget because States have discretion to use the funds in any of 29 specified purpose areas, many of which are not drug related (e.g., crime victim assistance). The effect of this restatement removes approximately \$400 to \$500 million per year from the Federal drug control budget. Also, the restatement includes the addition of the National Highway Traffic Safety Administration's Drug Impaired Driving program, which trains law enforcement officers and prosecutors in detecting and prosecuting drug-impaired drivers. (Source, pp. 4, 5.) Data for years prior to 2005 have been recalculated by the Source to reflect these changes and therefore will differ from previous editions of SOURCEBOOK.

<sup>a</sup>The data presented represent the following types of budget authority: 1996-1999, "actual"; 2000-2003, "final" budget authority enacted in the prior year; 2004, current year "enacted"; and 2005, "requested" for the budget year under formulation. Percents may not add to 100 because of rounding.
