Petit jurors determine questions of fact, in any civil or criminal action, through hearing the evidence presented at trial. The "Juror Usage Index" is the average number of jurors on hand for each jury trial day; it is calculated by dividing the total number of available jurors by the total number of jury trial days.

<sup>a</sup> Percents may not add to 100 because of rounding.

<sup>b</sup> Each juror is counted for each day serving, traveling, or waiting at the courthouse to serve.

<sup>c</sup> Includes jurors in travel status.
