Local	80	86	80	84	69	60	56	48	61	69	61

Note: These data were collected through the Census of Fatal Occupational Injuries conducted annually by the Bureau of Labor Statistics in cooperation with numerous Federal, State, and local agencies. Data were compiled from various Federal, State, and local administrative sources including death certificates, workers' compensation reports and claims, medical examiner reports, police reports, news reports, and reports to various regulatory agencies.

The Census of Fatal Occupational Injuries, therefore, includes data for all fatal work injuries, whether they are covered by the Occupational Safety and Health Administration (OSHA), another Federal or State agency, or are outside the scope of regulatory coverage. Federal agencies participating in the census include OSHA, the Employment Standards Administration, the Mine Safety and Health Administration, the Federal Aviation Administration, the Federal Railroad Administration, the Department of Energy, and the U.S. Coast Guard. State and local agencies participating in the census include State and local police departments; State vital statistics registers; State departments of health, labor, and industries; State farm bureaus; and local coroners and medical examiners. Multiple sources were used because studies have shown that no single source captures all job-related fatalities. Source documents were matched so that each fatality is counted only once. To ensure that a fatality was work related, information was verified from two or more independent source documents or from a source document and a followup questionnaire.

Users interested in workplace homicide figures for years beyond 2002, see [table 3.135.2005](#). Categories for "major occupation" are based on the 1990 Occupational Classification System. Categories for "major industry" are based on the *Standard Industrial Classification Manual, 1987*.

^aDetail may not add to total because of the omission of miscellaneous categories.

^bThe workplace homicides that occurred as a result of the events of Sept. 11, 2001 are not included in this table.

^cMay include volunteers and workers receiving other types of compensation.

^dIncludes paid and unpaid family workers, and may include owners of incorporated businesses and farms or members of partnerships.

^eNo data reported or data did not meet publication criteria specified by the Source.

^fPersons identified as Hispanic may be of any race; therefore detail will not add to total.

^gIncludes fatalities to workers employed by government agencies regardless of industry.
