Note: The National Crime Victimization Survey (NCVS) is conducted annually for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. These estimates are based on data derived from a continuous survey of a representative sample of housing units in the United States. For the 2006 survey, approximately 135,300 residents in 76,000 housing units were interviewed. Response rates were 91% of eligible housing units and 86% of eligible individuals in interviewed households. In 2006, the total U.S. population age 12 and older was 247,233,080. The total number of households in the United States in 2006 was 117,858,380. The NCVS is based on interviews with victims and therefore cannot measure murder.

Users should be aware that due to changes in methodology implemented for the 2006 survey, these national level estimates are not comparable to NCVS estimates from previous years. For survey methodology and definitions of terms, see [Appendix 8](#).

^aDetail may not add to total because of rounding.

^bEstimate is based on about 10 or fewer sample cases.

^cIncludes verbal threats of rape and threats of sexual assault.
