Note: See Notes, [tables 3.64](#), [3.71](#), and [3.74](#). For drugs not included in this table, daily use was below 0.2% in all years. Readers interested in responses to this question for 1986 and 1987 should consult previous editions of SOURCEBOOK. Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK. For survey methodology and definitions of terms, see [Appendix 6](#).

<sup>a</sup>Less than 0.05%.

<sup>b</sup>Only drug use that was not under a doctor's orders is included here.

<sup>c</sup>In 1993 and 1994, the question was changed slightly in half of the questionnaire forms to indicate that a "drink" meant "more than a few sips." Data for 1993 and 1994 are from the revised and unrevised forms combined. Beginning in 1995, all forms include the revised wording.
