Note: These data are compiled from the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting Program. The data presented in this table may differ from those presented in the U.S. Department of Justice, Federal Bureau of Investigation, *Crime in the United States, 2007* because this table includes data processed by the FBI after the cutoff date for that publication. According to the Source, in many States where drunkenness and/or vagrancy are not treated as criminal actions, these categories are not permissible causes of arrest. In one respect, these data may be considered conservative estimates of alcohol-related arrests. The FBI classifies arrests by a single offense, using a hierarchical rule. Consequently, crimes committed while intoxicated are categorized under the primary offense. On the other hand, "driving under the influence" includes impairment due to any type of drug; it is not limited to impairment due to alcohol. Data for 2007 were not available for Florida.
