Note: These data are compiled from the Federal Bureau of Investigation's (FBI) Uniform Crime Reporting Program. Because the number of agencies submitting arrest data varies from year to year, users are cautioned about making direct comparisons between 2009 arrest totals and those published for previous years. According to the Source, in many States where drunkenness and/or vagrancy are not treated as criminal actions, these categories are not permissible causes of arrest. In one respect, these data may be considered conservative estimates of alcohol-related arrests. The FBI classifies arrests by a single offense, using a hierarchical rule. Consequently, crimes committed while intoxicated are categorized under the primary offense. On the other hand, "driving under the influence" includes impairment due to any type of drug; it is not limited to impairment due to alcohol.
