Note: Data for 1983, 1988, 1993, 1999, and 2005 are from the National Jail Census. Data for 1984-87, 1989-92, 1994-98, 2000-2004, and 2006-2008 are from the Annual Survey of Jails taken during noncensus years. Both the censuses and the surveys are conducted for the U.S. Department of Justice, Bureau of Justice Statistics by the U.S. Census Bureau. These data reflect inmates held in jail facilities on a single day at midyear, usually June 30 or the last business day in June. The data from the annual surveys are estimates and therefore are subject to sampling variation.

A jail is defined as a locally administered confinement facility that holds inmates beyond arraignment, usually for more than 48 hours, and is administered and staffed by municipal or county employees. Excluded from the censuses and surveys were temporary holding facilities, such as physically separate drunk tanks and police lockups, and other holding facilities that did not hold persons after they were formally charged in court. Also excluded for all years were Connecticut, Delaware, Hawaii, Rhode Island, and Vermont because these States have integrated jail-prison systems. Alaska also was excluded as an integrated system; however, beginning in 1988, locally operated jails in Alaska are included.

Some data have been revised by the Source and may differ from previous editions of SOURCEBOOK. For methodology and survey sampling procedures, see [Appendix 4](#).

^aData for years prior to 1994 include an unknown number of persons who were under jail supervision but not confined. Beginning in 1994, data are based on the number of inmates held in jail facilities.

^bJuveniles are persons defined by State statute as being under a certain age, usually 18, and subject initially to juvenile court authority even if tried as adults in criminal court. In 1994, the definition was changed to include all persons under age 18 on the reference date.

^cNumber of jail inmates per 100,000 U.S. residents on July 1 of each year.

^dThe average daily population is the sum of the number of inmates in jail each day for a year, divided by the number of days in the year.

^eRated capacity is the number of beds or inmates assigned by a rating official to facilities within each jurisdiction.

^fThe number of inmates divided by rated capacity multiplied by 100. Prior to 1994, this ratio may include some inmates not in physical custody, but under the jurisdiction of a local jail, such as inmates on electronic monitoring, under house arrest, or in day reporting or other community supervision programs. Beginning in 1994, the ratio includes only those held in jail.

^gDetailed data for 1-day counts are estimated and rounded to the nearest 100.
