

*Third Thursday  
Breakfast Broadcast*

**Thursday, December 18, 2008, 9:00 - 10:00 am ET**

## Body Modification

Body modifications such as piercing, tattoos, and indoor tanning have become very popular in recent years, especially among teenagers and young adults. However these body altering practices are associated with real health risks. During this program, you will be introduced to different types of body modifications and the health risks associated with them. Interviews with local health departments and people who perform these body modifications will provide insight into the different health risks and the steps that can be taken to minimize these risks.

### Registration

**This presentation will only be available via webcast.**
