Structural Competency and Health Equity: Asian American Experience in New York City
Originally presented on January 26, 2016

Speaker:
Chau Trinh-Shevrin, PhD
Associate Professor, Departments of Population Health and Medicine, NYU School of Medicine, and Principle Investigator and Scientific Director, NYU Center for the Study of Asian American Health

Asian Americans are an extremely diverse population, with profound differences across Asian ethnic groups with respect to country of origin, immigrant status, migration histories, access to resources, language access, and socioeconomic status. This presentation aims to discuss: 1) the terminology around structural competency and health equity; 2) the underlying landscape of bias, stigma, stereotypes, and discrimination; 3) the Asian American experience; and 4) practice and policy implications to support structural competency and advancement of health equity.

Learning Objectives
After watching this webinar participants will be able to:

- Define terms: health disparity, health inequity, health equity, cultural competency, structural competency
- Discuss the role of context: social determinants of health, unconscious bias, stigma, stereotypes, and discrimination
- Describe the Asian American experience in New York City with respect to health disparities
- Describe practice and policy implications relevant to advancing health equity among Asian American populations
