Description of Courses Open to Non-Degree Students: Spring 2017

See the course schedule for days and times of course offerings.

**Inequality and Health, (3 credits)**
This is an elective course for the MSW degree. This course is open to graduate and undergraduate juniors and seniors. Juniors and Seniors will need a permission number to register.

Early health researchers discovered that illness (and death resulting from it) were unequally distributed in a number of societies. An early link to poverty – inequity in the distribution of wealth and power - was the hallmark of this work. This course focuses on the linkages between our social lives and our overall health, presents evidence for this links, and presents examples of new research in this area. In addition to exploring patterns of inequality in the society, we will also focus on the ways these carry over to the health care system.

**Human Behavior and Social Environment II (SSW 611), 3 credits**
This is a required course for the MSW degree. The prerequisite for course is SSW 610 Human Behavior and Social Environment I. This is the second part of a two-course sequence that is required in the MSW program.

This course is a continuation of SSW 610 focusing on psychosocial dysfunction. The course emphasizes the multiple determinants of human behavior including biological, psychological, social and environmental factors.

**Macro Practice in Social Work II (SSW 631), 3 credits**
This is a required course for the MSW degree. The prerequisite for this course is SSW 630, Macro Practice in Social Work I. This is the second part of a two-course sequence that is required in the MSW program. The Monday evening section meets at Kids Oneida in Utica, NY.

Introduces social work practice at the group, organizational, community and societal levels with emphasis on at-risk and oppressed populations. Historical, theoretical and service delivery issues that form the context for social work practice in these areas. Themes include the history of macro-practice in social work; organization, group and community theory; non-clinical roles in social work; and the organizational and community contexts for the provision of social services.

**Introductory Research Methods (SSW 660), 3 credits**
This is a required course for the MSW degree. Prerequisite is graduate status.

Introduction to research methods in social work including content on defining social work research problems, developing and testing hypotheses, the logic of causal inference, sampling, measurement (including reliability and validity), basic skills in data analysis and research utilization, the ethics of research, and research issues concerning human diversity. Emphasizes methods and content relevant to social work practice and the problems of social welfare.
