The World of Chemistry has made my freshman year fun and successful. I was introduced to so many opportunities and so many influential people that have expanded my horizons.

- Kaycie Lawson, World Representative

How to Apply

The Living-Learning Community application is part of the University at Albany’s housing application process and will be available to you when you apply for housing through MyUAlbany as of May 2, 2016.

♦ Select the L-LC you would like to join from the list

♦ Select your intended major (including “undecided”), so that the staff in Student Engagement can be sure the preferred L-LC will be a good fit for you

♦ Tell us why you would like to be a member of the L-LC you have chosen and how you can contribute to that particular community

Students who are selected to be members of their chosen L-LC will be notified via University at Albany e-mail beginning late June.

Questions about the L-LCs can be directed to Student Engagement at studentengagement@albany.edu.

General questions about housing and roommate assignments can be directed to the Department of Residential Life at reslife@albany.edu.

Learn Where You Live
The World of Chemistry is designed for incoming freshmen with an interest in chemistry. Members of the World of Chemistry will socialize with like-minded peers, learn more about the field of chemistry and related career paths, and be introduced to scholars with active and expanding research programs at the University at Albany. Members of the World of Chemistry will participate in a variety of social and academic activities, such as:

- Review sessions and study groups
- Tours of research facilities and laboratories
- Social gatherings with your L-LC friends
- Panels with senior chemistry students
- Guest speakers working in the field
- Invitations to Albany Medical Center events

The World of Chemistry is open to intended chemistry, biochemistry, and molecular biology majors, as well as physics majors with a strong interest in chemistry.

Living
As a member of the World of Chemistry, you will live with other incoming freshmen who share your interest in chemistry.

Learning
You will take one or two of your classes together in the fall and spring semesters of your freshman year and attend co-curricular events together as a community.

Community
As a member of an L-LC, you will have a built-in community of friends from the start!

Friends: Study and socialize with fellow L-LC members. Tackle those first-year courses with your friends by forming study groups where you live!

World Ambassadors: “Learn the ropes” from peers selected from last year’s most engaged L-LC students.

Community Assistant: Meet weekly with an upper-class/graduate student to plan or attend social, academic, and community service events.

Lead Faculty Member: Get to know a member of the faculty outside of the classroom at weekly lunches or dinners in your own dining hall!

Academic Advisor: Each L-LC has its own Academic Advisor to help you plan your pathway to success.

Leadership Opportunities: Become a World Representative. Go on to assume a campus-wide leadership role.

Recent national studies have shown that living-learning communities positively impact student success! Faculty interaction outside the classroom is directly linked to student satisfaction and enhanced learning.

Responsibilities of L-LC Members
- Register for the designated L-LC classes
- Attend lunch or dinner with the faculty mentor and weekly L-LC meetings and/or activities with the Community Assistant
- Participate in All World Events with the other L-LCs (typically two per semester)
- Participate in at least one community service project with your L-LC each semester
- Be a vital and engaged member of your L-LC and of the University at Albany community

For more information about the World of Chemistry, including classes and activities, or to learn more about the responsibilities of being in an L-LC, please visit our website.
