

TABLE OF CONTENTS

About the Editor	v
Preface	xiii

PART I: INTRODUCTION

1) Educational Beliefs: An Overview	3
2) Technology Tools and Techniques: An Overview	8
3) Assessment of Technology's Impact on Learning: An Overview	11

PART II: VIGNETTES

Physical Sciences and Engineering

1) An Interactive, Multimedia Web Site for the General Chemistry Laboratory <i>Sally R. Hair, Dartmouth College</i>	19
2) Impact of Technology on the Teaching of Chemistry <i>Allen D. Bishop, Jr., Millsaps College</i>	22
3) Computer Modeling in First-Year General Chemistry <i>Arthur Glasfeld, Reed College</i>	24
4) Using Technological Tools in General Chemistry <i>Angela G. King and Yue-Ling Wong, Wake Forest University</i>	26
5) Learning Chemical Reaction Equilibria on CD-ROM <i>William M. Clark, Worcester Polytechnic Institute</i>	30
6) What Is Engineering?: A Course That Incorporates a Virtual Laboratory <i>Michael Karweit, Johns Hopkins University</i>	34
7) Statics Online: Educational Software for the World Wide Web <i>Edwin R. Carney, David B. Oglesby, Nathaniel Keen, Tuncay Akbas, Michael Garner, and David Crites, University of Missouri, Rolla</i>	36
8) Introduction to Computing in Engineering <i>Richard Shiavi, John Bourne, Arthur Brodersen, and Edward White, Vanderbilt University</i>	40
9) Developing an Effective Web-Based Engineering Course <i>Madison Daily and Susan L. Murray, University of Missouri, Rolla</i>	42
10) Teaching Signal Processing Using Notebooks <i>Richard Shiavi, Vanderbilt University</i>	44
11) Using a Course Web Page in Teaching Geomorphology <i>Robert M. Newton, Smith College</i>	46

- 12) A General Science Class for Nonmajors
John F. Wallin, George Mason University 48
- 13) Melding Network Technology with Traditional Teaching:
Enhanced Achievement in a 500-Student Course
Edwin Kashy, Michael Thoennesen, Yihjia Tsai, Nancy E. Davis, and Guy Albertelli II,
Michigan State University 51
- 14) Interactive Teaching Tools for Astronomy:
Web Tools in Support of an Introductory Science Course
Chris Impey, University of Arizona 56
- 15) Interactive Physics
Cindy Schwarz, Vassar College 61
- 16) Applying Technology to Introductory Physics
Robert E. Akins, Washington and Lee University 63
- 17) Web-Based Tools for the Effective Teaching of High Enrollment, Multisection Courses
Fred Moore, Whitman College 64
- Computer Science, Information Systems, and Mathematics** 67
- 18) Experiences Using a High-Quality MPEG Video Server to Aid Classroom Teaching
Mark Gaynor, Vijak Sethaput, and H. T. Kung, Harvard University 73
- 19) Computing Concepts and Competencies
Mark Urban-Lurain and Donald Weinsbank, Michigan State University 75
- 20) Systems Analysis: A Graduate Course
Richard Vigilante, New York University 77
- 21) Computer-Enhanced Calculus
David Pravica, Michael J. Spurr, and James Wirth, East Carolina University 81
- 22) Student-Centered Learning of Statistics Using Multimedia
John D. Emerson, Middlebury College 84
- 23) Inserting the Web into Precalculus
David Slavit and Joshua Yeidel, Washington State University 87
- 24) What You Expect Is Not Always What You Get: Ruminations and Recommendations
from Teaching and Taking an Online Course
Frank W. Connolly and Teresa Fernandez, American University 91
- 25) Industrial Technology: Internet Research Tools
Elmer Poe, East Carolina University 93
- Biological Sciences and Medicine** 93
- 26) Science Education for Hostile Nonscience Majors
Richard H. Falk, University of California, Davis 95
- 27) Human Physiology
Stephen H. Loomis, Connecticut College 98
- 28) Using PowerPoint and the Campus Network for Student Presentations
Mark Sutherland, Hendrix College

29) Empowerment for Electronic Education: Building Student Confidence in a New Way of Learning <i>James L. Stofan and Linda H. Bruce, Johns Hopkins University</i>	100
30) Genetics and Multimedia Technology: A Meiosis Made in Heaven <i>Sarah Lea McGuire, Millsaps College</i>	103
31) Computer-Enhanced Teaching of Cell and Molecular Biology <i>Robin S. Treichel, Oberlin College</i>	105
32) Computerized Cross-Sectional Imaging in the Study of Human Anatomy <i>David A. Damassa, Walid El-Bermani, Myra Rufo, and Robert F. Willson, Tufts University</i>	109
33) Virtual Lectures Free Students to Think Critically <i>Harry R. Matthews, University of California, Davis</i>	111
34) Patient Assessment: Physical Examination Skills <i>James A. Karboski, University of Texas, Austin</i>	114
35) Interactive Biochemistry <i>Charles M. Grisham, University of Virginia</i>	116
36) The Virtual Fetal Pig Dissection <i>Earl W. Fleck, Whitman College</i>	118

Social Sciences

37) Disciplining Commonsense Explanations of Communication with Structured Online Dialogues <i>Sally Jackson, Stacy Wolski, Joseph Bonito, and Leah Polcar, University of Arizona</i>	121
38) It's the Process That Counts! Communication Tools and Techniques for Teaching in the Virtual Classroom <i>Concetta M. Stewart and Stella F. Shields, Temple University</i>	124
39) Teaching with an Online Public Forum <i>Jean Goodwin, Northwestern University</i>	127
40) Native American History and Culture <i>Raymond A. Bucko, LeMoyne College</i>	129
41) Museums and Social Science <i>Raymond A. Bucko, LeMoyne College</i>	132
42) Mystery Fossil: A Software Tool for Active Student Engagement in Introductory Anthropology Courses <i>John T. Omohundro and Peter S. Brouwer, SUNY, Potsdam</i>	135
43) Virtual Multimedia Laboratories and Examinations in Physical Anthropology <i>John Kappelman, University of Texas, Austin</i>	138
44) Teaching MBA Students to Compete in Simulated Oligopoly Environments <i>Phillip S. Crooke, Luke Froeb, and Steven Tschantz, Vanderbilt University</i>	141
45) CyberShows: Using Information Technology to Solve a Dilemma <i>Gordon E. McCray, Wake Forest University</i>	143
46) Unanticipated Benefits from the Use of Computer Technology in a Large Introductory Course <i>Andrew P. Barkley, Kansas State University</i>	147
47) A Computer-Enhanced Course in Microeconomics <i>Byron W. Brown, Michigan State University</i>	149

48) Competitive Strategies: A Team/Case-Based Approach to Economics Education <i>Sheldon Sax and Michael Claudon, Middlebury College</i>	153
49) The Economists' Way of Thinking <i>David G. Brown, Wake Forest University</i>	156
50) Shared Field Experience in Teacher Education <i>Timothy J. Schwob, SUNY, Potsdam</i>	159
51) Interactive Multimedia in an Integrated Course in Science, Education, and Technology <i>Angelo Collins, Vanderbilt University</i>	161
52) Teaching Future Teachers with Technology <i>Sarah E. Irvine, American University</i>	165
53) Information Technology and Learning <i>Al Rudnitsky, Smith College</i>	168
54) Electronic Conferencing and International Political Economy <i>Jeffrey Cason, Middlebury College</i>	171
55) Threads as an Alternative to the Paper Quizzes <i>John R. Galvin, Tufts University</i>	173
56) International Students in the World of US Technology <i>Leslie Opp-Beckman, University of Oregon</i>	175
57) From Analog to Digital: Teaching About Criminal Sentencing with Technology <i>Kent E. Portney, Steve Cohen, and Sal Soraci, Tufts University; and Jerry Goldman, Northwestern University</i>	178
58) Psychology and the Arts <i>Sam C. Carrier, Oberlin College</i>	183
59) Careers, Practice, and Professional Computing for Sociology <i>Raymond A. Bucko, LeMoyne College</i>	186
60) Multimedia Courseware in a Social Sciences Methods and Statistics Class <i>Carolee Larsen, Millsaps College</i>	189
61) Women's Studies 241: Feminist Approaches to Science and Technology <i>Donna Heiland and Janet M. Gray, Vassar College</i>	193
62) Going the Distance: Webbing a Hospitality Cost-Controls Course <i>Rebecca Gould, Kansas State University</i>	195
Fine Arts	
63) Beginning Drawing <i>Donald R. Sexauer, East Carolina University</i>	198
64) Advanced Design Studies <i>Andrea Wollensak, Connecticut College</i>	200
65) Using High-Quality Computer Images in the Teaching of Art History <i>Charles S. Rhyne, Reed College</i>	203
66) Artifact: An Interactive Software Program for the Survey of Art History <i>Eva R. Hoffman, Tufts University</i>	205

67) Envisioning Information <i>Ed Epping, Williams College</i>	209
68) CD-ROMs in a Modern Architecture Course <i>M. David Samson, Worcester Polytechnic Institute</i>	211
69) Costume Museum Archive <i>Kathryn Robe, University of Virginia</i>	214
70) Curriculum Development in Music Education <i>Peter R. Webster, Northwestern University</i>	215
71) Creating and Using Multiple Media in an Online Course <i>Maurice Wright, Temple University</i>	217
72) Computer-Enhanced Learning in Music <i>Maud Hickey, Northwestern University</i>	220
 Literature, Languages, Writing, and Humanities	
73) Pompeii as Urban Laboratory <i>John J. Dobbins, University of Virginia</i>	222
74) Collaborating on Technology and American Frontiers <i>Hugh A. Blackmer, Washington and Lee University</i>	224
75) Adapting to a Digital Culture: Technical Writing in a Networked Classroom <i>Michael R. Moore, University of Arizona</i>	226
76) Problem-Posing Learning in the Computer Writing Classroom <i>Linda S. Bergmann and Lucas P. Nailer, University of Missouri, Rolla</i>	229
77) English 101: Hypermedia/Phanopoeia <i>Michael Joyce, Vassar College</i>	232
78) Synchronous and Nonsynchronous Exchange in Basic and Advanced English Classes <i>Mark A. Wollaeger, Vanderbilt University</i>	234
79) Web-Based Resources in a Traditional Literature Course <i>Gail B. Sherman, Reed College</i>	238
80) Documentary Technologies <i>Shawn James Rosenheim, Williams College</i>	240
81) Using a Template to Teach French Holocaust Literature <i>Patrick Henry, Whitman College</i>	241
82) A Revolutionary Literature <i>Wilda Anderson, Johns Hopkins University</i>	243
83) A Cross-Cultural, Web-Based Approach to Developing Students' Understanding of a Foreign Culture <i>Gilberte Furstenberg and Shoggy Waryn, Massachusetts Institute of Technology</i>	246
84) Using Technology to Increase Writing <i>Franziska Lys, Northwestern University</i>	250
85) Introducing Multimedia Materials in Intermediate Spanish, or How I Learned to Love Technology <i>Nancy Saporta Sternbach, Smith College</i>	253
86) Implementing Chat Software in the Foreign-Language Curriculum: The Case of RTA <i>Robert J. Blake, David W. Fahy, and Richard F. Walters, University of California, Davis</i>	254

87) Enhancing the Study of Foreign Language with Technology: A CD-ROM and Companion Web Site for First-Year French <i>Carl S. Blyth, University of Texas, Austin</i>	258
88) New Conversations: Web-Based Forums in Spanish Civilization and Culture <i>Jeffrey C. Barnett, Washington and Lee University</i>	260
89) Latin American Culture, a Movie Lab, and a Professor <i>Angel A. Rivera, Worcester Polytechnic Institute</i>	263
90) Poetry in Motion: The Rilke Project <i>Joan Keck Campbell, Dartmouth College</i>	267
91) The Application of New Information Technologies to an Antarctica and Falklands/Malvinas Negotiation and Mediation Simulation <i>Jack Child, American University</i>	270
92) Cyberscapes <i>Mark C. Taylor, Williams College</i>	273
93) Jerusalem: The City and Its People <i>Roger Brooks, Connecticut College</i>	275
