ACKNOWLEDGMENTS	xi
INTRODUCTION	xiii
A new perspective, some struggles, and a hope	
I. THE SWEET EDGE	1
Learning is physical—we can understand!	
PART I: FOUNDATIONS 11	
2. WHERE WE OUGHT TO BE	13
The natural relationship between brain structure and learning	
3. HOLDING A JUST BALANCE	31
Brain connections that change data into knowledge	
4. OUR TRADE AND OUR ART	47
Evolution of the brain and motivation of the learner	
5. A FEELING OF THIS BUSINESS	69
In the business of reason and memory, feelings count	
SUMMARY OF PART I 88	
PART II: KNOWLEDGE, NEURONAL NETWORKS, CHANGE, AND RECOMMENDATIONS FOR THE TEACHER 89	
6. WHAT WE ALREADY KNOW	91
To begin, find out about existing neuron networks	
7. ONLY CONNECT!	111
How teachers can change neuronal networks	
SUMMARY OF PART II 132	

PART III: USING MORE OF THE CEREBRAL CORTEX
TO DEEPEN LEARNING 133

8. SENSE LUSCIOUS	135
Using the power of the sensory brain to help people learn	
9. WAITING FOR UNITY	153
Helping people comprehend their experience	
10. THE COURAGEOUS LEAP	177
Creating knowledge by using the integrative frontal cortex	
11. TEST BY TRIAL	203
Using the motor brain to close the loop of learning	
12. WE DID THIS OURSELVES	221
Changing the brain through effective use of emotion	
SUMMARY OF PART III 245	
EPILOGUE	247
Enrichments
