Do you teach mathematics in grades 6, 7 or 8?
Are you a special education teacher for grades 6-8?
Are you a remedial math teacher for grades 6-8?
Are you an AIS teacher for grades 6-8?

TMU is pleased to announce

POST MARCH PLANNING SESSIONS

Would you like ten hours of PAID professional development time to plan your mathematics instruction following the March assessments?

Planning Seminars are organized around the questions you have regarding mathematics at the middle school level (grades 5 – 8). At the first meeting you will work with TMU Graduate Assistants to develop goals for your group. Some ideas may include:

- How do the revised New York State Learning Standards for Mathematics coordinate with our current mathematics curriculum?
- What understandings do our students struggle with and what instructional strategies might support students as they struggle?
- What evidence do we have from student work that shows us what students do and do not understand?
- What mathematical concepts are common across mathematics curricula?

First Meeting:
Monday, March 27, 2006
3:15 – 4:15
Mont Pleasant Middle School Library

Light refreshments will be served

Any questions? Please contact Tosha Burnie-Grimmer at 442-4583 or tgrimmer@nycap.rr.com
