

### Assignment 3

Website 2 – *matrix.html*

Due: June 4, 2009

#### ***Requirements for this web page:***

1. Banner, created in the last class
2. Table for layout to organize the graphics
3. An 'image' folder under public\_html/ist361 with all gif or jpeg files there

#### Assignment 3 description:

Link the two pages you will create below to your homepage!

#### **1st Digital Matrix**

Create a table (digital matrix) that organizes 6 self-portrait images that have been altered in Photoshop. You can use the same original self-portrait. Each self-portrait must have unique effects or features produced in Photoshop. Utilize at least 6 different effects and explore others as well.

Organize all 6 images in a fixed table with the dimension 640 x 480 or 800 x 600. The file size for all images must be consistent, based on the fixed table dimension. The entire table (and images) must fit on the page without major scrolling (left, right, top, or bottom) and without images that appear too large.

The images must be original. You can alter the same photo or digital image 6 times, or work with different images. *Name this file 'matrix1.html' place in your IST361 folder on itsunix, and link it to your homepage.*

#### **2nd Digital Matrix**

Create a table (digital matrix) that organizes 6 scene images that have been altered in Photoshop. Each scene image must be unique and feature different Photoshop effects. Utilize at least 6 different effects and explore others as well. You can use some of the effects from the 1st Digital Matrix but you must have at least 6 new effects.

Organize all 6 images in a fixed table with the dimension 640 x 480 or 800 x 600. The file size for all images must be consistent, based on the fixed table dimension. The entire table (and images) must fit on the page without major scrolling (left, right, top, or bottom) and without images that appear too large.

The images must be original. You can alter the same photo or digital image 6 times, or work with different images. *Name this file 'matrix2.html' place in your IST361 folder on itsunix, and link it to your homepage.*
