

Assignment 4 (Portfolio)

Due: June 11, 2009

Link the URL to your homepage before the class!

Requirements for this web page:

1. Navigation bar, created in the last class
2. CSS (embedded or linked) to organize the layout of your page
3. An **'images'** folder under public_html/ist361 with all gif or jpeg files there
 - ✓ This would be a good time to ensure that your **“images”** folder permissions are set to all “read” and “execute”

Instructions

- Create a landing page that contains links to all your homework assignments. Name this file **'portfolio.html'**
- You must have a navigation bar created in the Fireworks with the following elements (you can use the one created in the class)
 - Home
 - Assignments
 - Projects
 - Feedback
 - Contact
- Use *colors and appropriate fonts* to make text *easy to read*.
- Include graphics, banner (you can use one created earlier for your “index.html” page, or you can create a new one).
- Center Graphics/Menus/Text/tables on your page.
- Use <div> tags and CSS (linked or embedded) as needed to align elements of your page.
- Create 2 more pages (Assignments and Contact) using the same template and link them to the appropriate navigation elements, assignments and contact respectively.
- Link your assignments completed so far to the Assignments page.
- Include your e-mail (it should be clickable, mailto link) on the contact page
- This would be a good time to ensure that your first two assignments are neat and look professional.
