

## Final Project Outline

*Due: June 16, 2009*

Hand in a one double spaced page (print) outline of your final web site project.

The description should include:

- ✓ the objective for this website
- ✓ what is the main purpose of this web site
- ✓ what the content will be for all pages of your site
- ✓ who is the audience for this site
- ✓ who is the owner of this site
- ✓ how will the content of this site be maintained

*Here are some ideas for final project topic:*

1. **Tutorial** based on exploration of software program or coding technique and supported with web sites, books, or one interview with an expert in the field (email interview is fine).
2. **Campus based not-for-profit organization or student group** based on interviews with group or organization, and supported with archival research, newspapers, and records (if organization or group provides content this must be clearly indicated).
3. **Community based not-for-profit organization** based on interviews with organization, and supported with archival research, newspapers, and records (if organization provides content this must be clearly indicated).
4. **Client Web Site** based on the specific needs of a client from a professional business or organization (requirements for this option will vary depending on feedback from client, but we need to be in conversation about how the project develops).
5. **Information Site** - resource material with a specific theme (e.g. arts, architecture, climate etc.)

**YOU ARE ENCOURAGED TO BE CREATIVE AND CHOOSE A TOPIC OF YOUR OWN INTEREST NOT LISTED ABOVE.**
