

Creating a slideshow in Fireworks, and exporting it to a Flash animation
<http://www.albany.edu/~aa645188/ist361/album.html>

1. Create a new “slideshow” folder in your ist361 folders
2. Download at least 5 new images and save them in the “slideshow” folder
3. Open Fireworks, create a new file
4. Go to Commands menu, chose Create Slideshow
5. Add “Albums” and “Images” using + sign
6. In the “Album Book Properties” add title, description and chose *Player* type (e.g. silver flash, or black flash etc.)
7. Customize Album Properties, Captions, Filters (e.g. convert to Sepia tone, blur or sharpen), and Slideshow Properties (e.g. fade, dissolve, fly etc.)
8. In the Export Options, specify the “export path” to your “**ist361/slideshow**” folder on your S: drive
9. Customize image size and thumbnail size
10. Make sure “export images”, “generate XML” and “export thumbnails” boxes are checked
11. Click “Create”
12. View the slideshow in the browser and link it to your assignments page
