## Infinite Geometric Sum

Some basic mathematical formulas can be proved by a geometric "proof without words" [1]. Figures 1 and 2 each prove the infinite geometric sum formula

$$\frac{1}{1-r} = 1 + r + r^2 + \cdots.$$

Figure 1: Benjamin G. Klein and Irl C. Bivens

$$\triangle PQR \sim \triangle TSP$$
$$\therefore 1 + r + r^2 + \cdots = \frac{1}{1-r}.$$

Figure 2: Warren Page
