</tbody>
</table>

Note: See Note, table 3.166. This table has been revised by the Source due to a change in survey methodology beginning with the 2001 data. Data for 1977-2000 have been adjusted to include only intentionally set structure fires and are comparable to the figures for 2001 and later.

*Does not include events of Sept. 11, 2001, which resulted in 2,451 civilian deaths and property loss valued at $33,440,000,000.
