Overview of Raster Imagery used in GIS
Glen Johnson, March 11, 2004

• Remote Sensing Sources
  (based on sensing specific wavelengths of the electromagnetic spectrum)

  * satellites:
    i.e. …
    LANDSAT
    SPOT
    MODIS

  * aerial photography:
    - true color
    - color infrared
    - panchromatic
    need to be orthorectified

• Scanned Images
  i.e.
  USGS topographic maps
  site photos
