Peter Dreisman
Director, Megatek Corporation
1267 Broadway, 23rd Floor
New York, NY 10010

Dear Mr. Dreisman:

I learned of your company through the Career Development Center at the University at Albany. In May 2002, I will graduate with a Master's degree in Computer Science and would be interested in a software engineering position with Megatek.

As a graduate student, I am one of six members on a software development team writing a computer-aided aircraft design program for NASA. My responsibilities include designing, coding, and testing of a graphical portion of the program, which requires the use of GAIRO for graphics input and output. I have a strong background in computer-aided design, software development and engineering, and believe that these skills would benefit the designing and manufacturing aspects of Template software. Enclosed is my resume which further outlines my qualifications.

I am very interested in working for Megatek, and would like the opportunity to discuss employment opportunities with you. I will contact you in a week to ten days to answer any questions you may have and see if you need any additional information from me. Thank you for your consideration.

Sincerely,

Sung Won Hong
