

In celebration of our 25th Anniversary and the launch of our new Discovery Center

Robert C. Parker School

presents

A Panel Discussion

Educating for Innovation

How do we equip children to thrive in an Age of Innovation?

Wednesday, April 5th

6:30 - 8:00 PM

From the realms of science, math and engineering and the halls of international business and secondary and higher education, we are bringing together five innovative leaders to engage in a conversation about igniting children's minds and hearts in an Age of Innovation.

Our goal is to find new solutions, commit to leading, and share what we discover. Get ready to engage!

Free and Open to the Public
