

## The Anthropology Department and the Center for the Elimination of Minority Health Disparities Presents:

**Noël Cameron,**  
Loughborough University, Department of Human Services

### **"Inequalities in an equal society: South African child health and wellbeing after apartheid"**

Noël Cameron obtained his Ph.D. (Medicine) under the supervision of Professor James Tanner, at London University's Institute of Child Health, specializing in the normal and abnormal growth and development of children. From 1984 to 1997 he was a member of the Department of Anatomy at the University of the Witwatersrand, Johannesburg, South Africa. In 1997 he became Professor of Human Biology at Loughborough University in the UK. Prof Cameron has published widely in the international press on health of children in developing countries. He initiated (1987-1990) and was Director (1990 - 1997) of the Birth To Ten birth-cohort study in Soweto-Johannesburg, South Africa which has studied the effect of the urban environment on the growth, development, health and wellbeing of over 3000 children. His current research focuses on issues of fetal programming, and the development of obesity.
