

Tips for Healthy Eyes

Get an eye examination every year or two (annually after age 60).

Eat a **healthy diet** with at least five fruits and vegetables a day. Eat foods high in Vitamin A -- for example, milk, cheese, egg yolk, and liver.

Protect your eyes from the sun's harmful rays.

Wear sunglasses with maximum ultraviolet protection (block 99-100% of UV-A and UV-B rays).

Take periodic **rest breaks** from your computer or other close work to relax your eyes.
